Energy performance of buildings (recast)
(COM(2021)0802 – C9-0469/2021 – 2021/0426(COD))

Proposal for a directive**Article 2 – paragraph 1 – point 2***Text proposed by the Commission*

2. ‘zero-emission building’ means a building with a very high energy performance, as determined in accordance with *Annex I*, where *the* very low amount of energy still required is fully covered by energy from renewable sources generated *on-site, from* a renewable energy community within the meaning of Directive (EU) 2018/2001 [amended RED] *or from a* district heating and cooling system, in accordance with the requirements set out in Annex III;

Amendment

2. ‘zero-emission building’ means a building with a very high energy performance, as determined in accordance with *Annexes I and III, which contributes to the optimisation of the energy system through demand-side flexibility*, where *any* very low *residual* amount of energy still required is fully covered by energy from: *(a) renewable sources generated or stored on-site (b) renewable sources generated nearby off-site or delivered through the grid in accordance with Directive (EU) 2018/2001 [amended RED], (c) a renewable energy community within the meaning of Directive (EU)*

2018/2001 [amended RED]; *or (d) renewable energy and waste heat from an efficient* district heating and cooling system *within the meaning of [amended EED]*, in accordance with the requirements set out in Annex III;

Energy performance of buildings (recast)
(COM(2021)0802 – C9-0469/2021 – 2021/0426(COD))

Proposal for a directive**Annex III – point I – paragraph 5***Text proposed by the Commission**Amendment*

Only where, due to the nature of the building or lack of access to renewable energy communities or **eligible** district heating and cooling systems, it is technically not feasible to **fulfil** the requirements under the first paragraph, the total annual primary energy use may also be covered by energy from the grid **complying with** criteria **established at national level**.

Where, due to the nature of the building or lack of access to renewable energy communities or **renewable energy from** district heating and cooling systems **or waste heat**, it is technically **or economically** not feasible to **fully comply with** the requirements under the first paragraph, **the remaining share or all of** the total annual primary energy use may also be covered by **renewable** energy from the grid, **documented with power purchase agreements and renewable heating and cooling purchase agreements as referred to in [revised RED], or energy from an efficient district heating and cooling**

system in accordance with Article 24(1) of Directive (EU) .../... [recast EED]. The Commission shall issue guidance on how to implement and verify the above criteria with special attention to technical and economical feasibility.
