*Text proposed by the Commission*

(2) Regulation (EC) No 138/2004 of the European Parliament and the Council\(^1\) sets up the economic accounts for agriculture (EAA) in the Union by providing for the methodology and the time limits for the transmission of the agricultural accounts. The economic accounts for agriculture are satellite accounts of national accounts, as defined by ESA 2010, with the purpose of obtaining results that are harmonised and comparable between the Member States in order to draw up the accounts for the purposes of the Union.

(2) Regulation (EC) No 138/2004 of the European Parliament and the Council\(^1\) sets up the economic accounts for agriculture (EAA) in the Union by providing for the methodology and the time limits for the transmission of the agricultural accounts. The economic accounts for agriculture are satellite accounts of national accounts, as defined by ESA 2010, with the purpose of obtaining results that are harmonised and comparable between the Member States in order to draw up the accounts for the purposes of the Union. In 2016, the European Court of Auditors published a special report on the Commission’s system for performance measurement in relation to farmers’ incomes. That report includes sound and relevant observations and recommendations regarding the economic accounts for agriculture and Regulation (EC) No 138/2004.

(3) The regional economic accounts for agriculture (REAA) are a regional-level adaptation of the EAA. National figures alone cannot reveal the full and sometimes complex picture of what is happening at a more detailed level. Therefore, regional-level data help to increase the understanding of the diversity that exists between regions, complementing information for the Union, the euro area and individual Member States. The REAA therefore need to be integrated into Regulation (EC) No 138/2004 both in terms of methodology and appropriate transmission deadlines.

(4) Statistics are no longer considered to be just one among many sources of information for policymaking purposes but instead play a central role in the decision-making process. Evidence-based decision-making requires statistics that meet high-quality criteria, as set out in Regulation (EC) No 223/2009 of the European Parliament and of the Council\(^\text{18}\), in accordance with the purposes they are serving. *High-quality statistical data are a central tool for monitoring and evaluating the implementation of the CAP and the fulfilment of its specific objectives. The regional economic accounts for agriculture are also crucial for assessing accurately the contribution of the agricultural sector to the achievement of the European Green Deal, in particular the Farm to Fork Strategy.*

Evidence-based decision-making requires statistics that meet high-quality criteria, as set out in Regulation (EC) No 223/2009 of the European Parliament and of the Council\textsuperscript{18}, in accordance with the purposes they are serving. Those objectives and the tools to achieve them should be proportionate, taking into consideration the additional administrative workload for farmers.

Text proposed by the Commission

(5) Regulation (EC) No 223/2009 provides the legal framework for European statistics and requires Member States to comply with the statistical principles and quality criteria specified in the Regulation. Quality reports are essential for assessing, improving and communicating on the quality of European statistics. The European Statistical System Committee (ESSC) has endorsed the single integrated metadata structure as the ESS standard for quality reporting, thereby helping to satisfy, through uniform standards and harmonised methods, the statistical quality requirements laid down in Regulation (EC) No 223/2009, in particular those set out in Article 12 (3) thereof.

79) In ANNEX III., in paragraph 2, which amended Annex III. of Regulation (EU) No 1307/2013, is added new column as follows:
The amendment extends the transitional measures for support from the European Agricultural Fund for Rural Development (EAFRD) and the European Agricultural Guarantee Fund (EAGF) until 31 December 2023. The European Commission needs 1 year to prepare delegated and implementing regulations for the three regulations reforming the Common Agricultural Policy. Member States' paying agencies need at least half a year to reprogram...
software to manage payments to farmers. The Ministries of Agriculture of the Member States need at least half a year to prepare and discuss the national strategic plan with the professional public and the Commission. This amendment gives all actors the necessary time to properly prepare for the launch of the CAP reform. Budgeted amounts will be adapted in agreement with the Council in the Trilogue.
