B7-0482/2013

Matthias Groote, Karl-Heinz Florenz, Dan Jørgensen, Corinne Lepage, Bas Eickhout, Sabine Wils

on behalf of the Committee on the Environment, Public Health and Food Safety
on the climate change conference in Warsaw, Poland (COP 19)

Motion for a resolution

Paragraph 19

Motion for a resolution

Amendment

19. Notes that the EU is on track to achieve emissions reductions well beyond the current 20 % target, and ***highlights the fact that more ambition is also needed to create scarcity on the carbon market; recalls that it is in the EU's own interest to adopt a climate protection target of 30 % by 2020, thus creating sustainable growth and additional jobs and reducing dependence on energy imports; calls for the EU to increase its target;***

19. Notes that the EU is on track to achieve emissions reductions well beyond the current 20 % target, and ***reiterates that the EU has offered to increase its emission reduction target to 30 % by 2020 if other major emitting countries commit to comparable reduction targets***, thus creating sustainable growth and additional jobs and reducing dependence on energy imports;

Paragraph 6

Motion for a resolution

Amendment

6. Welcomes the proposal by Ban-Ki Moon to hold a world leaders' climate summit in September 2014, as well as a people's pre-COP in 2014 in Venezuela; emphasises the importance of a well-prepared event with meaningful outcomes and engagement at the highest political level and with civil society, in order to secure and maintain the necessary political momentum ahead of the 2014 and 2015 Conferences; deems it necessary for a successful 2015 agreement that countries come forward with greenhouse gas reduction commitments before the world leaders' summit; stresses that the EU must set an example and **adopt** ambitious 2030 **targets** for greenhouse gas reductions, energy efficiency and renewable energy in time for the summit;

Paragraph 13 a (new)

Motion for a resolution

Amendment

13a. Recalls that, according to the IEA, EU emissions represent about 11 % of global emissions and will represent an even lower share in the decades to come; underlines the fact that higher ambition and acceptance of ambitious climate change policies could be achieved by industrial actors and energy sectors if a higher level of ambition were shown through similar efforts on the part of other global economies;
