Amendment
— having regard to Article 5 of the Treaty on European Union, in particular to the principle of conferral according to which competences not conferred upon the Union in the Treaties remain with the Member States,

Or. en
Amendment 38
Bartosz Arłukowicz

Motion for a resolution
Recital A

Motion for a resolution

A. whereas Europe’s Beating Cancer Plan should effectively respond to the call for progress by the families and doctors of the 1.3 million people who die from cancer each year in Europe, including 6 000 children, the crucial needs of patients who are currently in need of efficient and innovative treatments, the rightful expectations of more than 12 million cancer survivors facing the difficult return back to a ‘normal life’, the clear will of future generations to be protected against health threats, and the concern of governments facing a growing economic burden from cancer and its related treatments;

Amendment

A. whereas Europe’s Beating Cancer Plan should effectively respond to the call for progress by the families and doctors of the 1.3 million people who die from cancer each year in Europe, including 6 000 children, the crucial needs of patients who are currently in need of rapid diagnosis, as well as efficient and innovative treatments, the rightful expectations of more than 12 million cancer survivors and their families facing the difficult return back to a ‘normal life’, the clear will of future generations to be protected against health threats, and the concern of governments facing a growing economic burden from cancer and its related treatments; whereas all Union actions in the fight against cancer should aim to increase the five-year survival rate of cancer patients; whereas the early detection rate of cancer should be increased by 25% by 2030 compared to 2020;

Or. pl

Amendment 39

Motion for a resolution
Recital A b (new)

Motion for a resolution

Amendment

Ab. whereas the COVID-19 pandemic has notably impeded the correct diagnosis and treatment of cancer patients; whereas an estimated 100 million screening tests were not performed in Europe during the pandemic and 1 million cancer cases are undiagnosed; whereas 1 in 5 cancer patients did not receive the surgical or chemotherapy treatment they needed on time; whereas the pandemic has created an urgent need to build back cancer services in all European countries;

Amendment 49
Alexis Georgoulis, Giorgos Georgiou

Motion for a resolution
Recital A b (new)

Motion for a resolution

Amendment

Ab. whereas the COVID-19 pandemic has caused severe disruptions to cancer screening programmes, treatment, research, and survivorship and follow-up services, and has created an urgent need to build back cancer services in all
European countries and to address highly concerning backlogs in prevention actions, such as in HPV vaccination, as well as in early detection and diagnosis;

Amendment 50
Hilde Vautmans, Irena Joveva

Motion for a resolution
Recital A b (new)

Amendment

Ab. whereas the COVID-19 pandemic has caused severe disruptions to cancer screening programmes, treatment, research, and survivorship and follow-up services, and has created an urgent need to build back cancer services in all European countries and to address highly concerning backlogs in prevention actions, such as in HPV vaccination, as well as in early detection and diagnosis;

Amendment 51
Tomislav Sokol, Deirdre Clune, Sunčana Glavak, Cindy Franssen

Motion for a resolution
Recital A b (new)

Amendment

Ab. whereas the COVID-19 pandemic has caused severe disruptions to cancer screening programmes, treatment, research, and survivorship and follow-up services, and has created an urgent need to build back cancer services in all European countries and to address highly concerning backlogs in prevention actions, such as in HPV vaccination, as
well as in early detection and diagnosis;

Amendment 52
Alessandra Moretti

Motion for a resolution
Recital A b (new)

Motion for a resolution  Amendment

Ab. whereas the COVID-19 pandemic has caused severe disruptions to cancer screening programmes, treatment, research, and survivorship and follow-up services, and has created an urgent need to build back cancer services in all European countries and to address highly concerning backlogs in prevention actions, such as in HPV vaccination, as well as in early detection and diagnosis;

Amendment 53
Margarita de la Pisa Carrión, Pietro Fiocchi

Motion for a resolution
Recital A b (new)

Motion for a resolution  Amendment

Ab. whereas the COVID-19 pandemic has had, and is still having, negative effects due to delays in the cancer diagnosis, treatment, care and survivorship with the resulting impact on cancer patients, survivors, families and health care professionals; whereas healthcare professionals have supported the burden of a pandemic and a very stressful working environment;
Amendment 54  
Margarita de la Pisa Carrión  

Motion for a resolution  
Recital A c (new)  

Motion for a resolution  

Amendment  
Ac. whereas the primary competence for health matters remains with the Member States;  

Or. en  

Amendment 55  
Margarita de la Pisa Carrión  

Motion for a resolution  
Recital A d (new)  

Motion for a resolution  

Amendment  
Ad. whereas action by the EU in health matters can only provide added value if it is directed towards the strengthening of rapid response capacity and the coordination of actions;  

Or. en  

Amendment 56  
Margarita de la Pisa Carrión  

Motion for a resolution  
Recital A e (new)  

Motion for a resolution  

Amendment  
Ae. whereas tobacco and alcohol consumption cause severe diseases and provoke addiction, make people use substances or engage in behaviours that become compulsive, often continue
Amendment 57
Margarita de la Pisa Carrión

Motion for a resolution
Recital A f (new)

Amendment

Af. whereas smoking is an addictive, chronic and recurrent disease, the leading cause of premature and avoidable mortality, and responsible for 80-90% of lung cancers; it is therefore key to reduce incidence by reducing the number of people who take up smoking by raising awareness of the harm it causes, and to reduce prevalence by helping smokers to quit through treatment or alternatives to smoking cessation;

Or. en

Amendment 58
Margarita de la Pisa Carrión, Pietro Fiocchi

Motion for a resolution
Recital A g (new)

Amendment

Ag. whereas paediatric and adolescent cancer and its treatment and research need specific requirements and paediatric oncology should be differentiated from adult cancer;

Or. en
Amendment 59
Margarita de la Pisa Carrión

Motion for a resolution
Recital A h (new)

Motion for a resolution

Amendment

Ah. whereas prescriptive and mandatory standard data requirements given in the current law on chemical substances are not well suited to adapt to the rapidly evolving development of science;

Or. en

Amendment 60
Peter Liese
on behalf of the EPP Group

Tomislav Sokol, Nathalie Colin-Oesterlé, Liudas Mažylis, Maria Spyraki, Dolors Montserrat, Cindy Franssen, Adam Jarubas, Deirdre Clune, Sunčana Glavak, Bartosz Arlukowicz, Christian Sagartz

Motion for a resolution
Recital B

Motion for a resolution

Amendment

B. whereas Europe represents less than 10 % of the world’s population, but accounts for a quarter of all cancer cases, and whereas cancer is the second leading cause of death in Europe after cardiovascular diseases; whereas although there has been a slight decrease in mortality rates thanks to screening campaigns and therapeutic innovation, the number of cases diagnosed is nevertheless increasing, notably due to longer life expectancies, which results in ageing populations; whereas almost three quarters of all cancer diagnoses in the EU occur in people aged 60 or above;

B. whereas Europe represents less than 10 % of the world’s population, but accounts for a quarter of all cancer cases, and whereas cancer is the second leading cause of death in Europe after cardiovascular diseases; and the first cause of death by disease in children older than one year of age whereas although there has been a slight decrease in mortality rates thanks to screening campaigns and therapeutic innovation, the number of cases diagnosed is nevertheless increasing, notably due to longer life expectancies, which results in ageing populations; whereas almost three quarters of all cancer diagnoses in the EU occur in people aged 60 or above; whereas the specific needs of children and adolescents with cancer
require continued attention and support globally;

Or. en

Amendment 147
Giorgos Georgiou, Alexis Georgoulis, João Pimenta Lopes

Motion for a resolution
Recital J

J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research;
Amendment 148
Loucas Fourlas

Motion for a resolution
Recital J

Motion for a resolution

J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research;

Amendment

J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care follow-up care for survivors and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research;

Amendment 149
Ondřej Knotek, Irena Joveva

Motion for a resolution
Recital J

Motion for a resolution

J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer

Amendment

J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer
(prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research, deployment of treatment and care;

Amendment 150
Bartosz Arłukowicz

Motion for a resolution
Recital J

J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research and in the treatment process;

Amendment
J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research and in the treatment process;

Amendment 151
Peter Liese
on behalf of the EPP Group
Tomislav Sokol, Nathalie Colin-Oesterlé, Liudas Mažylis, Maria Spyraki, Dolors Montserrat, Cindy Franssen, Adam Jarubas, Deirdre Clune, Sunčana Glavak, Bartosz Arłukowicz
Motion for a resolution
Recital J

J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research;

Amendment
J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental, work related and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research;

Or. en

Amendment 152
Joëlle Mélin, Angelo Ciocca

Motion for a resolution
Recital J

J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research;

Amendment
J. whereas a comprehensive, multidisciplinary and coordinated approach to addressing social, individual, environmental and commercial health determinants is needed at regional, national and European level in order to support actions targeting all aspects of cancer (prevention, detection, treatment, palliative care and reintegration) through the effective mobilisation of key tools such as research and knowledge sharing; whereas new technologies and artificial intelligence have high potential for improvements in the field of cancer research;
Amendment 153
Nicolás González Casares, Maria Arena, Romana Jerković, Cyrus Engerer, Sara Cerdas, Patrizia Toia, Marc Angel, Estrella Durá Ferrandis

Motion for a resolution
Recital J a (new)

Amendment

Ja. whereas research and innovation are the only way to definitely beat cancer one day; whereas sustained and effective funding is needed to support ambitious projects and good and stable working conditions for researchers working in the cancer field; whereas pharmaceutical companies, including SMEs, are key for innovation in the cancer field;

Amendment 154
Margarita de la Pisa Carrión, Pietro Fiocchi

Motion for a resolution
Recital J a (new)

Amendment

Ja. whereas palliative care is mentioned in a very vague way in Europe’s Beating Cancer Plan, without elaborating on the need to make it part of the treatment process and quality care at the end of life;

Amendment 155
Margarita de la Pisa Carrión, Pietro Fiocchi
Motion for a resolution
Recital J b (new)

Motion for a resolution
Amendment

Jb. whereas there is an urgent need for an early incorporation of palliative care into cancer treatment; whereas developing specialised palliative care services in national healthcare systems is essential to achieve the best quality of care for cancer patients,

Amendment 156
Margarita de la Pisa Carrión

Motion for a resolution
Recital K

Motion for a resolution
Amendment

K. whereas the ‘Health in All Policies’ and ‘One Health’ approaches should be promoted further, and efforts to fight cancer should be integrated into all EU policies;

Amendment 157
Andrey Slabakov, Angel Dzhambazki, Pietro Fiocchi

Motion for a resolution
Recital K

Motion for a resolution
Amendment

K. whereas the ‘Health in All Policies’ and ‘One Health’ approaches should be promoted further, and efforts to fight cancer should be integrated into all EU policies;

K. whereas efforts to fight cancer should be a priority in EU policies;

K. whereas the ‘Health in All Policies’ and ‘One Health’ approaches could be promoted further in areas where the Commission and Member States find gaps, and efforts to fight cancer should be integrated, where appropriate, into all
relevant EU policies;

Amendment 158
Nicolás González Casares, Maria Arena, Romana Jerković, Sara Cerdas, Tudor Ciuhodaru, Marc Angel, Johan Danielsson, Estrella Durá Ferrandis

Motion for a resolution
Recital K

Motion for a resolution
Amendment

K. whereas the ‘Health in All Policies’ and ‘One Health’ approaches should be promoted further, and efforts to fight cancer should be integrated into all EU policies;

K. whereas the ‘Health in All Policies’ and ‘One Health’ approaches should be promoted further, and efforts to fight cancer should be integrated into all EU policies, notably to address commercial determinants of health;

Amendment 159
Joëlle Mélin

Motion for a resolution
Recital K

Motion for a resolution
Amendment

K. whereas the ‘Health in All Policies’ and ‘One Health’ approaches should be promoted further, and efforts to fight cancer should be integrated into all EU policies;

K. whereas the ‘Health in All Policies’ and ‘One Health’ approaches should be promoted further, and efforts to fight cancer should be integrated into all Member State policies;

Amendment 160
Antoni Comin i Oliveres

Motion for a resolution
Recital K a (new)
Motion for a resolution

Amendment

Ka. whereas Europe's Beating Cancer Plan could foster a new European mainstream culture of well-being, impacting the environmental and social determinants of cancer;

Or. en

Amendment 161
Antoni Comín i Oliveres

Motion for a resolution
Recital L a (new)

Motion for a resolution

Amendment

La. whereas action at EU-level contributes to prevention and early diagnosis of cancer, access to medicinal products, treatments and devices, and therapeutic innovation;

Or. en

M. whereas Europe’s Beating Cancer Plan could therefore represent the first step towards a real European Health Union;

M. whereas Europe’s Beating Cancer Plan could therefore represent an important step towards a real European Health Union;

Or. en

Amendment 169
Margarita de la Pisa Carrión, Pietro Fiocchi

Motion for a resolution
Recital M a (new)

Motion for a resolution
Amendment

Ma. whereas the fight against cancer in the EU should establish a firm commitment to a person-centred care model for cancer patients, integrating the biological, psychological, social and even spiritual perspectives, with a holistic approach, both for the early identification of all the needs that each person may have when diagnosed with cancer, throughout the disease process and for the resolution of these needs; whereas this vision of the person is necessary for a care model and which goes beyond the strict health conception of cancer, including a vision of social and community actions (for example accompaniment);

Or. en

Amendment 170
Pietro Fiocchi

Motion for a resolution
Recital M b (new)
Motion for a resolution

Amendment

Mb. Whereas the regulation on plant protection products (Regulation (EC) No 1107/2009) has the key objectives of protecting human and animal health and the environment while also improving agricultural production and safeguarding the competitiveness of the agricultural sector; and whereas the EU’s authorisation procedure for plant protection products is one of the most stringent in the world, taking approximately eleven years, requiring an average of over 200 scientific studies, and costing in excess of 220 million EUR to bring a product to the EU market;

Amendment 222
Aldo Patriciello

Motion for a resolution
Paragraph 4 a (new)

Motion for a resolution

4a. Acknowledges that carcinogenic viruses are responsible for around 10% of new cancer cases each year; recognises that such cancers are largely preventable; stresses the need for coordinated actions
targeting carcinogenic viruses, such as HPV, hepatitis B and hepatitis C, in order to prevent their transmission, improve their diagnosis and patients’ access to care, making their elimination a reality, thus also reducing the cancer burden;

Amendment 223
Maria Arena

Motion for a resolution
Paragraph 5

Motion for a resolution

5. Deplores the significant health inequalities in the EU as regards cancer prevention; insists on the need to pay special attention to vulnerable and marginalised populations in order to ensure their access to cancer prevention services;

Amendment

5. Deplores the significant health inequalities in the EU as regards cancer prevention and screening; insists on the need to pay special attention to vulnerable and marginalised populations in order to ensure that their exposure to risk factors from food and products in their daily environment is minimised, and to ensure their access to cancer prevention services and to adequate information; considers in this regard that cancer prevention also needs to be framed in the context of social justice entailing the need for systemic changes through population-wide public policies beyond changes in individual behaviour;

Amendment 224
Nicolás González Casares, Alessandra Moretti, Maria Arena, Romana Jerković, Sara Cerdas, Cyrus Engerer, Patrizia Toia, Tudor Ciuholdaru, Marc Angel, Johan Danielsson, Estrella Durá Ferrandis

Motion for a resolution
Paragraph 5
Motion for a resolution

5. Deplores the significant health inequalities in the EU as regards cancer prevention; insists on the need to pay special attention to vulnerable and marginalised populations in order to ensure their access to cancer prevention services;

Amendment

5. Deplores the significant health inequalities and inequities in the EU as regards cancer prevention; insists on the need to pay special attention to vulnerable and marginalised populations, people with disabilities, and people living in remote areas, such as rural or outermost regions, in order to ensure their access to cancer prevention services, including smoking cessation services, obesity treatment and HPV vaccination; considers in this regard that cancer prevention also needs to be framed in the context of social justice, which implies the need for systemic changes through public policies beyond changes in individual behaviour;
