Paragraph 4

Motion for a resolution

4. Takes note of the calculation of the annual GNI lump-sum reductions for certain Member States, which amount to just over EUR 5 billion net; highlights the fact that those rebates are calculated using the most recent Gross Domestic Product deflator for the Union and not the standard 2 % deflator; stresses that the current high rate of inflation therefore increases the size of the rebates while at the same time it reduces the real-term value of the Union budget, thereby further increasing the funding gap faced by the Union budget; *recalls its long-standing position that rebates and other correction mechanisms should be abolished;*
