AMENDMENTS
466 - 796

Draft report
Michèle Rivasi, Claude Turmes
(PE604.777v01-00)

Proposal for a regulation
(COM(2016)0759 – C8-0497/2016 – 2016/0375(COD))
Amendment 466
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point -a (new)

Text proposed by the Commission

\(-a\) implement strategies and measures designed to maintain Union greenhouse gas emissions within a carbon budget consistent with the Paris Agreement;

Or. en

Amendment 467
Piernicola Pedicini, Dario Tamburrano, Eleonora Evi, David Borrelli, Rosa D'Amato

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point -a a (new)

Text proposed by the Commission

\(-aa\) implement long term climate and energy strategies and measures to achieve, at the latest by 2040, a highly energy efficient, with low energy needs, and fully renewables based energy system, which fully reflects the energy efficiency/energy savings potential and a target of net zero greenhouse gas emissions within the Union by 2040, going into negative emissions by 2050.

Or. en

Amendment 468
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Miroslav Poche, Edouard Martin, Pervenche Berès, Eugen Freund, Karin Kadenbach, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, José Blanco López, Flavio Zanonato, Claudiu Ciprian Tănăsescu
Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point a

Text proposed by the Commission

(a) implement strategies and measures designed to meet the objectives and targets of the Energy Union, and for the first ten-year period from 2021 to 2030 in particular the EU’s 2030 targets for energy and climate;

Amendment

(a) Implement long-term climate and energy strategies and measures to achieve by 2050 a highly energy efficient and highly renewables-based energy system, which fully reflects the Energy Efficiency First principle;

Or. en

Amendment 469
Gunnar Hökmark, Angélique Delahaye, Krišjānis Kariņš, Christofer Fjellner, Marian-Jean Marinescu, Mairead McGuinness, Séan Kelly, Françoise Grossetête, Henna Virkkunen, Lefteris Christoforou, Esther de Lange, Francesc Gambús, Anne Sander, Michel Dantin, Angelika Niebler, Pilar del Castillo Vera, Vladimir Urutchev

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point a

Text proposed by the Commission

(a) implement strategies and measures designed to meet the objectives and targets of the Energy Union, and for the first ten-year period from 2021 to 2030 in particular the EU’s 2030 targets for energy and climate;

Amendment

(a) implement strategies and measures designed to meet the objectives and targets of the Energy Union, and for the first ten-year period from 2021 to 2030 in particular the EU’s 2030 targets for energy and climate, as well of achieving an integrated internal energy market, primarily at regional level;

Or. en

Amendment 470
João Ferreira

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point a

Text proposed by the Commission

(a) implement strategies and measures designed to meet the objectives and targets of the Energy Union, and for the first ten-year period from 2021 to 2030 in particular the EU’s 2030 targets for energy and climate;

Amendment

(a) implement strategies and measures designed to meet the objectives and targets of the Energy Union, and for the first ten-year period from 2021 to 2030 in particular the EU’s 2030 targets for energy and climate, as well of achieving an integrated internal energy market, primarily at regional level;

Or. en
designed to meet the objectives and targets of the Energy Union, and for the first ten-year period from 2021 to 2030 in particular the EU's 2030 targets for energy and climate;

designed to meet the objectives and targets set at the national and the Union level, and for the first ten-year period from 2021 to 2030 in particular the EU's 2030 targets for energy and climate;

Amendment 471
Soledad Cabezón Ruiz, José Blanco López, Inmaculada Rodríguez-Piñero Fernández, Patrizia Toia

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point a a (new)

Text proposed by the Commission

Amendment

(aa) implement long-term climate and energy strategies and measures designed to achieve – at the latest by 2050 – a highly energy-efficient and fully renewables-based energy system, which fully reflects potential for energy efficiency and energy savings and aims to achieve net zero greenhouse gas emissions within the Union, and makes the most of the energy potential of the various regions, within a comprehensive notion of efficiency.

Justification

We need to take full advantage of the potential of the various regions, considering or prioritising energy-efficient use of resources in each geographical area, and considering as a priority the exploitation of renewable resources in regions where there is a greater potential for exploitation.

Amendment 472
Kateřina Konečná

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point a a (new)
Amendment 473

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point a a (new)

Text proposed by the Commission

Amendment

(aa) implement strategies and measures designed to decrease Union greenhouse gas emissions taking into account proportionality to overall ambition and effort of other parties to the Paris Agreement;

Or. en

Amendment 474
Soledad Cabezón Ruiz, José Blanco López, Inmaculada Rodríguez-Piñero Fernández, Patrizia Toia

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point a b (new)

Text proposed by the Commission

Amendment

(ab) structure new partnerships between Member States at macro-regional level to achieve the targets and objectives of the Energy Union with optimal cooperation between Member States and
their local authorities;

Justification

The intervention of the regional level is fundamental in countries such as Spain, where powers in energy-related matters are largely decentralised.

Amendment 475
Kateřina Konečná

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point a b (new)

Text proposed by the Commission

Amendment

(ab) implement long term climate and energy strategies and measures designed to achieve - at the latest by 2050 - a highly energy efficient and low-carbon energy system;

Or. en

Amendment 476
Jean-Luc Schaffhauser, Nicolas Bay

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b

Text proposed by the Commission

Amendment

(b) ensure the timeliness, transparency, accuracy, consistency, comparability and completeness of reporting by the Union and its Member States to the UNFCCC and Paris Agreement secretariat.

(b) ensure the timeliness, transparency, accuracy, consistency, comparability and completeness of reporting by the Member States to the UNFCCC and Paris Agreement secretariat.

Or. fr
Amendment 477
Soledad Cabezón Ruiz, José Blanco López, Inmaculada Rodríguez-Piñero Fernández, Patrizia Toia

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b a (new)

Text proposed by the Commission

Amendment

(bb) ensure predictability, transparency and effective public participation in climate and energy planning undertaken by Member States to build a broad societal consensus around climate change and the energy transition as well as to contribute to greater certainty for investors and help take full advantage of opportunities for economic development, job creation and social and territorial cohesion.

Or. es

Justification

We need to take full advantage of the potential of the various regions, considering or prioritising energy-efficient use of resources in each geographical area, and considering as a priority the exploitation of renewable resources in regions where there is a greater potential for exploitation.

Amendment 478
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley, Nils Torvalds

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b a (new)

Text proposed by the Commission

Amendment

(ba) support achieving the objective of reducing the greenhouse gas emissions of the Union by 80 to 95 % below 1990 levels in 2050 and the aim of the Paris Agreement of achieving a balance between anthropogenic emissions by sources and removals by sinks of greenhouse gases in the second half of this century.
Amendment 479
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D’Amato

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b a (new)

Text proposed by the Commission

Amendment

(ba) contribute to greater regulatory certainty, as well as ensure predictability, transparency, real and effective public participation in climate and energy planning undertaken by Member States to build-up broad societal participation in combating climate change and consensus about the energy transition.

Or. en

Amendment 480
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Edouard Martin, Pervenche Berès, Flavio Zanonato, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, Jo Leinen, José Blanco López

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b a (new)

Text proposed by the Commission

Amendment

(ba) structure new partnerships between Member States at macro-regional level to achieve the targets and objectives of the Energy Union in a cost-optimised manner and between Member States, their city regions and local authorities;

Or. en
Amendment 481
Patrizia Toia

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b a (new)

Text proposed by the Commission

Amendment

(bb) support attainment of the objective to reduce EU greenhouse gas emissions by 80 to 95% below 1990 levels by 2050 and to achieve climate neutrality in the second half of the century;

Or. it

Amendment 482
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Miroslav Poche, Pervenche Berès, Flavio Zanonato, Edouard Martin, Eugen Freund, Karin Kadenbach, Kathleen Van Brempt, Mapietra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, Miriam Dalli, José Blanco López, Claudiu Ciprian Tănăsescu, Victor Negrescu

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b b (new)

Text proposed by the Commission

Amendment

(bb) ensure predictability, transparency and effective public participation in climate and energy planning undertaken by Member States to build-up a broad societal consensus around climate change and the energy transition as well as to contribute to greater investor’s certainty;

Or. en

Amendment 483
Mireille D’Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b b (new)
(bb) ensure effective participation and information of civil society on the content of the national plans, so as, in particular, to stimulate private investment in the field of energy;

Or. fr

Amendment 484

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 1 – point b c (new)

(bc) support a just transition for citizens and regions which could be negatively impacted by the transition to a low-carbon economy;

Or. en

Amendment 485
Soledad Cabezón Ruiz, José Blanco López, Inmaculada Rodríguez-Piñero Fernández, Carlos Zorrinho

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 2

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding
integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Or. es

**Justification**

The intervention of the regional level is fundamental in countries such as Spain, where powers in energy-related matters are largely decentralised.

**Amendment 486**
Mireille D'Ornano, Jean-François Jalkh, Sylvie Goddyn

**Proposal for a regulation**
**Article 1 – paragraph 1 – subparagraph 2**

*Text proposed by the Commission*

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

*Amendment*

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to involving regional authorities in the Member States in the development and implementation of the national plans, and corresponding Commission action.
Amendment 487
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Miroslav Poche, Edouard Martin, Pervenche Berès, Flavio Zanonato, Eugen Freund, Karin Kadenbach, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, Patrizia Toia, Miriam Dalli, José Blanco López, Claudiu Ciprian Tănăsescu, Victor Negrescu

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 2

Text proposed by the Commission
The governance mechanism shall be based on integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, transparent, iterative process between the Commission and Member States ensuring full participation of citizens, social partners and local authorities in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Amendment
The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, transparent, iterative process between the Commission and Member States ensuring full participation of citizens, social partners and local authorities in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Amendment 488
Piernicola Pedicini, Dario Tamburrano, Eleonora Evi, David Borrelli, Rosa D'Amato

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 2

Text proposed by the Commission
The governance mechanism shall be based on integrated national energy and climate

Amendment
The governance mechanism shall be based on integrated national energy and climate
plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Amendment 489
Mireille D’Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 2

Text proposed by the Commission

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Amendment

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Or. en

Amendment 490
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley

PE606.313v01-00 14/169 AM\1129185EN.docx

EN
Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 2

Text proposed by the Commission

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Amendment

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Or. en

Amendment 491
João Ferreira

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 2

Text proposed by the Commission

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between the Commission and Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.

Amendment

The governance mechanism shall be based on integrated national energy and climate plans covering ten-year periods starting from 2021 to 2030, corresponding integrated national energy and climate progress reports by the Member States and integrated monitoring arrangements by the European Commission. It shall define a structured, iterative process between Member States in view of the finalisation of the national plans and their subsequent implementation, including with regard to regional cooperation, and corresponding Commission action.
Amendment 492
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Miroslav Poche, Edouard Martin, Pervenche Berès, Flavio Zanonato, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Nikos Androulakis, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, Patrizia Toia, José Blanco López, Claudiu Ciprian Tănăsescu, Victor Negrescu

Proposal for a regulation
Article 1 – paragraph 1 – subparagraph 2 a (new)

*Text proposed by the Commission*

Amendment

In conjunction with this Regulation, the Commission shall develop mechanisms to encourage coordination of energy and climate policies between relevant third countries and the EU, including, where appropriate, the sharing of long-term strategies and national energy and climate plans.

Or. en

Amendment 493
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato

Proposal for a regulation
Article 1 – paragraph 2 – introductory part

*Text proposed by the Commission*

Amendment

2. This Regulation shall apply to the following five dimensions of the Energy Union:

Or. it

Amendment 494
Mireille D'Ornano, Jean-François Jalkh, Sylvie Goddyn
Proposal for a regulation
Article 1 – paragraph 2 – point a

Text proposed by the Commission
(a) energy security;

Amendment
(a) energy security, aimed especially at energy self-sufficiency;

Or. fr

Amendment 495
Mireille D'Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 1 – paragraph 2 – point b

Text proposed by the Commission
(b) energy market,

Amendment
(b) energy market, and especially its regulation:

Or. fr

Amendment 496
Mireille D'Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 1 – paragraph 2 – point c

Text proposed by the Commission
(c) energy efficiency;

Amendment
(c) energy efficiency, including inter alia the energy efficiency of the buildings sector, which accounts for around 40% of overall energy consumption;

Or. fr

Amendment 497
Angelo Ciocca, Lorenzo Fontana

Proposal for a regulation
Article 1 – paragraph 2 – point e
Text proposed by the Commission

(e) research, innovation and competitiveness.

Amendment

(e) research and innovation

Or. it

Justification

(This amendment applies throughout the text)

Amendment 498
Mireille D'Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 1 – paragraph 2 – point e

Text proposed by the Commission

(e) research, innovation and competitiveness.

Amendment

(e) research and innovation

Or. fr

Amendment 499
João Ferreira

Proposal for a regulation
Article 1 – paragraph 2 – point e

Text proposed by the Commission

(e) research, innovation and competitiveness.

Amendment

(e) research and innovation

Or. en

Amendment 500
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato
Proposal for a regulation
Article 1 – paragraph 2 – point e a (new)

Text proposed by the Commission

(ea) a social approach to energy.

Or. it

Justification
Adding a social pillar to the Energy Union will help to genuinely place people at the centre of the process of transformation of the energy system and to recognise their fundamental role in attaining the EU’s objectives with regard to renewable energy, energy efficiency and combating climate change. The social dimension of energy therefore requires specific attention, not only indirect references within the chapters on the market.

Amendment 501
Mireille D’Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 2 – paragraph 2 – point 3

Text proposed by the Commission

(3) ‘adopted policies and measures’ mean policies and measures for which an official government decision has been made by the date of submission of the national plan or progress report and there is a clear commitment to proceed with implementation;

Amendment

(3) ‘adopted policies and measures’ mean policies and measures for which an official decision has been made by the competent national authorities by the date of submission of the national plan or progress report to proceed with implementation;

Or. fr

Amendment 502
Dario Tamburrano, Piernicola Pedicini, Eleonora Evi, David Borrelli, Rosa D'Amato

Proposal for a regulation
Article 2 – paragraph 2 – point 9

Text proposed by the Commission

(9) ‘the Union’s 2030 targets for energy and climate’ means the Union-
wide binding target of at least 40% domestic reduction in economy-wide greenhouse gas emissions as compared to 1990 to be achieved by 2030, the Union-level binding target of at least 27% for the share of renewable energy consumed in the Union in 2030, the Union-level target of at least 27% for improving energy efficiency in 2030, to be reviewed by 2020 having in mind an EU level of 30%, and the 15% electricity interconnection target for 2030 or any subsequent targets in this regard agreed by the European Council or Council and Parliament for the year 2030.

Amendment 503
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Edouard Martin, Pervenche Berès, Flavio Zanonato, Kathleen Van Brempt, Miaapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, Miriam Dalli, José Blanco López, Claudiu Ciprian Tănăsescu

Proposal for a regulation
Article 2 – paragraph 2 – point 9

Text proposed by the Commission

(9) 'the Union’s 2030 targets for energy and climate' means the Union-wide binding target of at least 40% domestic reduction in economy-wide greenhouse gas emissions as compared to 1990 to be achieved by 2030, the Union-level binding target of at least 27% for the share of renewable energy consumed in the Union in 2030, the Union-level target of at least 27% for improving energy efficiency in 2030, to be reviewed by 2020 having in mind an EU level of 30%, and the 15% electricity interconnection target for 2030 or any subsequent targets in this regard agreed by the European Council or Council and Parliament for the year 2030.

Amendment

deleted
Amendment 504

Proposal for a regulation
Article 2 – paragraph 2 – point 9

Text proposed by the Commission

(9) 'the Union's 2030 targets for energy and climate' means the Union-wide binding target of at least 40% domestic reduction in economy-wide greenhouse gas emissions as compared to 1990 to be achieved by 2030, the Union-level binding target of at least 27% for the share of renewable energy consumed in the Union in 2030, the Union-level target of at least 27% for improving energy efficiency in 2030, to be reviewed by 2020 having in mind an EU level of 30%, and the indicative 15% electricity interconnection target for 2030 or any subsequent targets in this regard agreed by the European Council or Council and Parliament for the year 2030.

Amendment

(9) 'the Union's 2030 targets for energy and climate' means the Union-wide binding target of at least 40% domestic reduction in economy-wide greenhouse gas emissions as compared to 1990 to be achieved by 2030, the Union-level binding target for the share of renewable energy consumed in the Union in 2030, as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], and the Union target for improving energy efficiency, as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], and the indicative 15% electricity interconnection target for 2030 as proposed by the European Commission or any subsequent targets in this regard agreed by the European Council or Council and Parliament for the year 2030.

Amendment 505
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley

Proposal for a regulation
Article 2 – paragraph 2 – point 9

Or. en
(9) ‘the Union’s 2030 targets for energy and climate’ means the Union-wide binding target of at least 40% domestic reduction in economy-wide greenhouse gas emissions as compared to 1990 to be achieved by 2030, the Union-level binding target of at least 27% for the share of renewable energy consumed in the Union in 2030, the Union-level target of at least 27% for improving energy efficiency in 2030, to be reviewed by 2020 having in mind an EU level of 30%, and the 15% electricity interconnection target for 2030 or any subsequent targets in this regard agreed by the European Council or Council and Parliament for the year 2030.

Amendment 506
João Ferreira

Proposal for a regulation
Article 2 – paragraph 2 – point 9

Text proposed by the Commission

(9) ‘the Union’s 2030 targets for energy and climate’ means the Union-wide binding target of at least 40% domestic reduction in economy-wide greenhouse gas emissions as compared to 1990 to be achieved by 2030, the Union-level binding target of at least 27% for the share of renewable energy consumed in the Union in 2030, the Union-level target of at least 27% for improving energy efficiency in 2030, to be reviewed by 2020 having in mind an EU level of 30%, and the 15% electricity interconnection target for 2030 or any subsequent targets in this regard agreed by

Amendment

(9) ‘the Union's 2030 targets for energy and climate' means the Union-wide binding target of at least 40% domestic reduction in economy-wide greenhouse gas emissions as compared to 1990 to be achieved by 2030, the Union-level binding target of at least 35% for the share of renewable energy consumed in the Union in 2030 as referred to in Article 3 of [recast Renewable Energy Directive], the Union-level target of at least 45% for improving energy efficiency in 2030 as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU and the 15% electricity interconnection target for 2030, increasing from 10% in 2020, or any subsequent review of these targets in this regard adopted by Council and Parliament for the year 2030.
the European Council or Council and Parliament for the year 2030.

Amendment 507

<td>(9) 'the Union’s 2030 targets for energy and climate' means the Union-wide binding target of at least 40% domestic reduction in economy-wide greenhouse gas emissions as compared to 1990 to be achieved by</td>
</tr>
</tbody>
</table>

Or. en
2030, the Union-level binding target of at least 27% for the share of renewable energy consumed in the Union in 2030, the Union-level target of at least 27% for improving energy efficiency in 2030, to be reviewed by 2020 having in mind an EU level of 30%, and the 15% electricity interconnection target for 2030 or any subsequent targets in this regard agreed by the European Council or Council and Parliament for the year 2030.

Amendment 509
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley

Proposal for a regulation
Article 2 – paragraph 2 – point 9 a (new)

Text proposed by the Commission

Amendment

(9a) 'the Union's 2020 interconnection targets for electricity' means the Union electricity interconnection target of at least 10% as agreed by Member States at a European Council in Barcelona in March 2002;

Or. en

Amendment 510
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley

Proposal for a regulation
Article 2 – paragraph 2 – point 11 a (new)

Text proposed by the Commission

Amendment

(11a) 'early efforts' means early progress of a Member State made as contribution from 2021 onwards to the Union level binding target for renewable energy as referred to in Article 3 of [recast of Renewable Energy Directive]
and contributions from 2021 onwards of a Member State to achieving the Union level binding target for improving energy efficiency as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU;

Amendment 511
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley

Proposal for a regulation
Article 2 – paragraph 2 – point 17 a (new)

Text proposed by the Commission

Amendment

(17a) 'energy efficiency first principle’ means that energy efficiency improvements to achieve energy savings across the whole energy value chain, in conversion, transmission, distribution and through the moderation of energy demand, is considered as a first step in energy system planning and policy design, in order to achieve a level playing field between supply and demand side policies and to ensure cost-effective investment of public resources;

Justification

The Commission's proposals refer several times to the 'energy efficiency first' principle but do not provide a definition in the legal text. Energy efficiency needs to be considered whenever energy system planning, reporting or financing decisions are taken and a clear definition of the 'energy efficiency first' principle will help in this respect.

Amendment 512
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato

Proposal for a regulation
Article 2 – paragraph 2 – point 18 a (new)
Justification

This definition aims at clarifying the term 'local authority' mentioned in several article of this Regulation.

Amendment 513
José Blanco López, Soledad Cabezón Ruiz, Inmaculada Rodríguez-Piñero Fernández

Proposal for a regulation
Article 2 – paragraph 2 – point 18 a (new)

(18a) 'local authority' means a public institution bearing legal personality, component of the State structure, below the level of national government, accountable to citizens; a local authority is usually composed of a deliberative or policy-making body (council or assembly) and an executive body (the Mayor or other executive officer), directly or indirectly elected or selected at local level; the term encompasses different tiers of government, e.g. villages, municipalities, districts, counties, provinces, regions, among others;

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment

1. By 1 January 2019 and every five years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year periods from 2026 to 2035, from 2031 to 2040, from 2036 to 2045 and from 2041 to 2050.

Or. en

Amendment 522
Paul Rübig

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment

1. 12 months after entry into force according to the provisions set out in Article 52 of this Regulation and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end
Justification

The timetable for the integrated national energy and climate plans is too ambitious and not realistically executable. As long as other Regulations and Directives (i.e. EED, RED), influencing the plans, are not adopted, national plans cannot be submitted. Planning security is crucial.

Amendment 523
Mireille D'Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan covers the period from 2021 to 2030, as well as any subsequent period at the discretion of the Member States. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment 524
João Ferreira

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall

Amendment

1. By 1 January 2020 and every ten years thereafter, each Member State shall

notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

present to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment 525
Evžen Tošenovský

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment

1. By 1 January 2020 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment 526
Pavel Telička

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in

Amendment

1. By 1 January 2020 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in
paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

**Justification**

*The proposed deadline is not realistic. The National plan has to include consultations with all stakeholders and time framework should take it into account.*

**Amendment 527**

**Miroslav Poche**

**Proposal for a regulation**

**Article 3 – paragraph 1**

*Text proposed by the Commission*

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

*Amendment*

1. By 1 January 2020 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

*Justification*

*The proposed deadline is not realistic given the scope of the National plan its consultation across all stakeholders.*

**Amendment 528**

**Kateřina Konečná**

**Proposal for a regulation**

**Article 3 – paragraph 1**
Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment

1. By 1 January 2020 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Or. en

Amendment 529
Jerzy Buzek, Janusz Lewandowski, Andrzej Grzyb, Christian Ehler, Vladimir Urutchev, Marian-Jean Marinescu

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment

1. By 1 January 2020 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Or. en

Justification

The timeline should be more realistic, especially given that first integrated national energy and climate plans should also reflect the final provisions of the RES Directive and Energy Efficiency Directive on which legislative work still continues.
Amendment 530
András Gyürk, György Hölvényi

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment

1. By 1 January 2020 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Or. en

Amendment 531
Zdzisław Krasnodębski, Jadwiga Wiśniewska

Proposal for a regulation
Article 3 – paragraph 1

Text proposed by the Commission

1. By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Amendment

1. By 1 January 2020 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Or. en

Justification

The proposed deadline for submitting the first draft is unrealistic. As a precondition for setting any timeframe, there should be an agreement on the required content of the integrated
national energy and climate plans. The timeframe for drafting the plans should also take into account public consultation requirement, as mentioned in Art.10, and government’s approval at Member State level.

Amendment 532
Jean-Luc Schaffhauser, Nicolas Bay

Proposal for a regulation
Article 3 – paragraph 1

*Text proposed by the Commission*

1. By 1 January 2019 and every ten years thereafter, each Member State shall **notify to the Commission** an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

*Amendment*

1. By 1 January 2019 and every ten years thereafter, each Member State shall **publish** an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

Or. fr

Amendment 533
Soledad Cabezón Ruiz, José Blanco López, Inmaculada Rodríguez-Piñero Fernández

Proposal for a regulation
Article 3 – paragraph 2 – point a

*Text proposed by the Commission*

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan;

*Amendment*

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of:

(i) an executive summary,

(ii) a description of the process implemented to involve local and regional
authorities, civil society, businesses and the general public in a dialogue pursuant to Articles 10 and 10(a) of this Regulation.

(iii) a description of macro-regional partnerships established pursuant to Article 11 of this Regulation with other Member States in preparing the plan and in organising together a cost-optimised, highly energy-efficient and fully renewables-based energy system that harnesses the energy potential of Europe’s various regions and is geared towards benefiting from opportunities offered by smart regional specialisation.

Or. es

Justification

In order to harness the full potential of the different territories, it essential to maintain consistency with regional innovation and smart specialisation policies. The intervention of the regional level is fundamental in countries such as Spain, where powers in energy-related matters are largely decentralised.

Amendment 534
Carolina Punset, Gerben-Jan Gerbrandy

Proposal for a regulation
Article 3 – paragraph 2 – point a

Text proposed by the Commission

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan;

Amendment

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan. **Member States should present a stakeholders' engagement plan to the European Commission prior to its execution. This plan shall include a detailed stakeholders' map and clearly outline how the opinions**
and recommendations of stakeholders’ shall be considered in the final preparation of the integrated national energy and climate plans. The views expressed by stakeholders shall also be considered at the stage of updating the plans;

Or. en

Amendment 535
Jerzy Buzek, Janusz Lewandowski, Andrzej Grzyb, Marian-Jean Marinescu, András Gyürk, György Hölvényi, Christian Ehler

Proposal for a regulation
Article 3 – paragraph 2 – point a

Text proposed by the Commission

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan;

Amendment

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan. Member States shall present to the Commission a stakeholders’ engagement plan prior to its execution with a detailed stakeholders’ map and clear outline on how stakeholders’ opinions and recommendations will be factored in the final version of their integrated national energy and climate plans. The view of stakeholders will have to be taken into account at the stage of updating the plans;

Or. en

Justification

It is crucial to make the process of drafting the integrated national energy and climate plans as transparent and open to stakeholders as possible.
Amendment 536
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato

Proposal for a regulation
Article 3 – paragraph 2 – point a

Text proposed by the Commission

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan;

Amendment

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of:

(i) an executive summary;

(ii) a description of the processes implemented to involve local authorities, civil society, businesses and the general public pursuant to Articles 10 and 10a of this Regulation, summary of comments and opinions provided within these processes and information how the comments and opinions expressed by stakeholders and the general public have been taken into account;

(iii) a description of regional cooperation with other Member States in preparing the plan;

Justification

The purpose of this amendment is to make sure that Member States do not only describe procedural arrangements of the public participation, consultation and active engagement processes but also inform the Commission about the content of these processes. Similar provision are recalled in Art. 10.1b, though is fundamental to state them within the description of the (general) content of NECPs.

Amendment 537
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Edouard Martin, Pervenche Berès, Flavio Zanonato, Kathleen Van Brempt, Miaepetra Kumpula-Natri, Olle Ludvigsson, Jytte

Article 3 – paragraph 2 – point c

Text proposed by the Commission

(c) a description of the policies and measures foreseen to meet the corresponding objectives, targets and contributions set out under point (b);

Amendment

(c) a description of the planned policies and measures foreseen to meet the corresponding objectives and targets set out under points (b) and (c), including a description of the way in which the principles of ‘energy efficiency first’ and ‘a fair deal for energy consumers’ are incorporated into these policies and measures;

Or. es

Justification

Ensuring a ‘fair deal for energy consumers’ should be another cross-cutting principle at the planning and implementation stages.

Amendment 549
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Miroslav Poche, Edouard Martin, Pervenche Berès, Flavio Zanonato, Eugen Freund, Karin Kadenbach, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Nikos Androulakis, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, José Blanco López
Proposal for a regulation
Article 3 – paragraph 2 – point c

Text proposed by the Commission

(c) a description of the policies and measures foreseen to meet the corresponding objectives, targets and contributions set out under point (b);

Amendment

(c) a description of the policies, measures and investment strategies foreseen to meet the corresponding objective and targets as set out under points (b) and (c), including a description of the way Energy Efficiency First principle is integrated into these policies and measures;

Or. en

Amendment 550
Michèle Rivasi, Claude Turmes
on behalf of the Verts/ALE Group

Proposal for a regulation
Article 3 – paragraph 2 – point c

Text proposed by the Commission

(c) a description of the policies and measures foreseen to meet the corresponding objectives, targets and contributions set out under point (b);

Amendment

(c) a description of the planned policies and measures foreseen to meet the corresponding objectives and targets set out under points (aa) and (b), including a description of the way the energy efficiency first principle is integrated into these policies and measures;

Or. en

Justification

(This amendment is replacing AM 55 of the draft report.)

Amendment 551
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato

Proposal for a regulation
Article 3 – paragraph 2 – point c
(c) a description of the policies and measures foreseen to meet the corresponding objectives, **targets and contributions** set out under point (b);

(c) a description of the **planned** policies and measures foreseen to meet the corresponding objectives **and targets** set out under point (aa) and (b), and the methodology used to treat energy efficiency as an infrastructure;

**Amendment 557**

Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Jeppe Kofod, Nessa Childers, Edouard Martin, Pervenche Berès, Flavio Zanonato, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, Miriam Dalli

Proposal for a regulation  
Article 3 – paragraph 2 – point d

**Text proposed by the Commission**

(d) a description of the current situation of the five dimensions of the Energy Union including with regard to the energy system and greenhouse gas emissions and removals as well as projections with regard to the objectives referred to in point (b) with already existing (implemented and adopted) policies and measures;

**Amendment**

(d) a description of the current situation of the five dimensions of the Energy Union including with regard to the energy system and greenhouse gas emissions and removals as well as projections with regard to the objectives and targets referred to in point (b) and (c) with already existing (implemented and adopted) policies and measures;

Or. en
Proposal for a regulation
Article 3 – paragraph 2 – point d

Text proposed by the Commission

(d) a description of the current situation of the five dimensions of the Energy Union including with regard to the energy system and greenhouse gas emissions and removals as well as projections with regard to the objectives referred to in point (b) with already existing (implemented and adopted) policies and measures;

Amendment

(d) a description of the current situation of the five dimensions of the Energy Union including with regard to the energy system and greenhouse gas emissions and removals as well as projections with regard to the objectives referred to in point (aa) and (b) with already existing (implemented and adopted) policies and measures;

Or. en

Proposal for a regulation
Article 3 – paragraph 2 – point e

Text proposed by the Commission

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);

Amendment

(e) an assessment of the impacts of individual and aggregated planned policies and measures to meet the objectives referred to in Articles 1, 4, 13a and 14, including quantified estimates of the greenhouse gas reduction, renewable energy uptake and energy savings potentials, at national and regional level; a description of the planned policies and measures and their individual and aggregated environmental, health, macro-economic, skills and social impacts, including, where appropriate, policies promoted by regional administrations;

Or. en
Justification

The participation at regional level is fundamental in countries such as Spain, where energy competences are largely decentralized. Regional plans are sometimes more ambitious in their objectives and targets than those of the Member States.

Amendment 560
Carolina Punset, Gerben-Jan Gerbrandy

Proposal for a regulation
Article 3 – paragraph 2 – point e

Text proposed by the Commission

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);

Amendment

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b), including quantified estimates of the greenhouse gas reduction potential of planned policies and measures, and including a description of the procedures carried out for their financing (taxes, ETS auctioning revenues, fees, tariffs, National Funds, etc.) as well as an evaluation of the total financial amount and its impact on the involved sectors and activities making sure funding of these policies is consistent with EU Climate Targets

Or. en

Justification

The integrated national energy and climate plans need to clearly identify the financial aspects of the policies undertaken: the origin of funds, the estimated total amount, the anticipated impact on involved sectors and activities. Impact analysis of this funding is necessary to make sure the consistency with the whole EU Climate Action.

Amendment 561
Theresa Griffin, Carlos Zorrinho, Nicola Caputo, Jude Kirton-Darling, Clare Moody, Csaba Molnár, Nessa Childers, Miroslav Poche, Edouard Martin, Pervenche Berès, Flavio Zanonato, Eugen Freund, Karin Kadenbach, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, José Blanco López, Simona Bonafè
Proposal for a regulation
Article 3 – paragraph 2 – point e

Text proposed by the Commission

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);

Amendment

(e) an assessment of the impacts of the planned policies, measures and investment strategies to meet the targets and objectives referred to in point (b) and (c); a description of the planned policies and measures and their individual and aggregated environmental, health, macro-economic, skills and social impact on workers and communities;

Or. en

Amendment 562

Proposal for a regulation
Article 3 – paragraph 2 – point e

Text proposed by the Commission

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);

Amendment

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b), including impacts on the demand of CO2 allowances within the trading scheme for greenhouse gas emission allowance;

Or. en

Amendment 563
Patrizia Toia

Proposal for a regulation
Article 3 – paragraph 2 – point e
Text proposed by the Commission

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);

Amendment

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b), including quantifying the potential for greenhouse gas reduction;

Amendment 564
Evžen Tošenovský

Proposal for a regulation
Article 3 – paragraph 2 – point e

Text proposed by the Commission

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);

Amendment

(e) if applicable an assessment of the impacts of the planned policies and measures and investment strategies to meet the objectives referred to in point (b);

Or. en

Amendment 565
Miroslav Poche

Proposal for a regulation
Article 3 – paragraph 2 – point e

Text proposed by the Commission

(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);

Amendment

(e) if applicable an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);

Or. en

Justification

The impact assessment is needed, but member states should have enough flexibility to
approach it, otherwise it can significantly delay the preparation of the National plan – it should be considered in the wording in this article and also in Annex II.

Proposal for a regulation
Article 3 – paragraph 2 – point f a (new)

Text proposed by the Commission

Amendment

(fa) Targets and objectives submitted by Member States shall only be at least equal to the ones set out in Article 4 and reflect an increased level of ambition as compared to the ones set in the latest integrated national energy and climate plan;

or.

Amendment 572
Marian-Jean Marinescu

Proposal for a regulation
Article 3 – paragraph 2 – point f a (new)

Text proposed by the Commission

Amendment

(fa) The decarbonisation path in national energy and climate plan shall not disrupt the balance in the energy mix of a Member State and shall not lead to increased dependence on energy imports;

or.

Amendment 573
Marian-Jean Marinescu

Proposal for a regulation
Article 3 – paragraph 2 – point f b (new)
Text proposed by the Commission

3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy Union and they shall use consistent data and assumptions across the five dimensions where relevant.

Amendment

3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy Union and they shall use consistent data and assumptions across the five dimensions where relevant. Member States shall also ensure that the preparation of the national plans will not result in an increase in administrative burden or costs for the concerned stakeholders.

Justification

The current levels of administration in implementing the climate and energy packages are already quite burdensome for industries. The priority should be to minimise red tape for industry.
Amendment 575
Soledad Cabezón Ruiz, José Blanco López, Inmaculada Rodríguez-Piñero Fernández, Patrizia Toia

Proposal for a regulation
Article 3 – paragraph 3

Text proposed by the Commission

Amendment

3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy Union and they shall use consistent data and assumptions across the five dimensions where relevant.

Justification

Ensuring a ‘fair deal for energy consumers’ should be another cross-cutting principle at the planning and implementation stages.

Amendment 576
Pilar del Castillo Vera, Pilar Ayuso, Francesc Gambús

Proposal for a regulation
Article 3 – paragraph 3

Text proposed by the Commission

Amendment

3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy Union, notably the principles of ‘energy efficiency first’ and ‘a fair deal for energy consumers.’ They shall use credible and consistent data and assumptions across the five dimensions where relevant and make the data used for modelling exercises publicly available.

Member States shall also take into account interlinkages with other policies and targets, especially in view of the need to build up a strong and
competitive industrial base.

Amendment 577
Miroslav Poche

Proposal for a regulation
Article 3 – paragraph 3

*Text proposed by the Commission*

3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy Union and they shall use consistent data and assumptions across the five dimensions where relevant.

*Amendment*

3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy Union and they shall use consistent data and assumptions across the five dimensions where relevant. **Member States shall also ensure that the preparation of the national plans will not result in an increase in administrative burden or costs for the concerned stakeholders.**

*Justification*

*The current levels of administration in implementing the climate and energy packages are already quite burdensome for industries. The priority should be to minimise administrative burden for industry.*

Amendment 578
Patrizia Toia

Proposal for a regulation
Article 3 – paragraph 3

*Text proposed by the Commission*

3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy
Union and they shall use consistent data and assumptions across the five dimensions where relevant.

Union and they shall use consistent data and assumptions across the five dimensions and across their own long-term national strategies referred to in Article 14(1).

iii. where applicable, other national objectives and targets consistent with existing long-term low emission strategies;

Amendment

iii. where applicable, other national objectives and targets consistent with the Paris Agreement and the long-term low emission strategies;

Or. en

Amendment 600
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – introductory part

Text proposed by the Commission

(2) with respect to renewable energy:

Amendment

(2) with respect to renewable energy and with the aim of achieving the Union's binding target of at least 45% renewable energy in 2030:

Or. en

Amendment 601
Kateřina Konečná

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – introductory part
with respect to renewable energy: and with a view to achieving the Union's binding target of at least 30% renewable energy in 2030:

Amendment 602
Gunnar Hökmark, Angélique Delahaye, Krišjānis Kariņš, Christofer Fjellner, Marian-Jean Marinescu, Mairéad McGuinness, Marijana Petir, Françoise Grossetête, Henna Virkkunen, Lefteris Christoforou, Peter Liese, Anne Sander, Michel Dantin, Francesc Gambús, Angelika Niebler, Pilar del Castillo Vera, Elisabetta Gardini, Massimiliano Salini, Vladimir Urutchev

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i (new)

Text proposed by the Commission

- i. The Commission shall set up an indicative benchmarks to ensure the fair contribution of each Member State to the target on renewable energy in 2030, as referred to in Article 3 of [recast of Directive 2009/28/EC], based on this indicative benchmark Member States shall communicate their indicative trajectories,

Amendment 603
Michèle Rivasi, Claude Turmes
on behalf of the Verts/ALE Group

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission

i. with a view to achieving the Union's binding target of at least 27% binding national target of energy from
renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

renewable sources in gross final consumption of energy in 2030 as set out in the fourth column of the table in part A of Annex Ia, with a binding linear trajectory set out in Part Aa of Annex Ia and starting from the share of energy from renewable sources in the year 2020 as set out in the third column of the table in part A of Annex Ia;

Or. en

Justification

(This amendment is replacing AM 70 of the draft report)

Amendment 604
Piernicola Pedicini, Dario Tamburrano, Eleonora Evi, David Borrelli, Rosa D'Amato

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment

i. the Member State's binding national target of energy from renewable sources in gross final consumption of energy in 2030, with a binding linear trajectory for target from 2021 onwards starting from the share of energy from renewable sources in the year 2020 as set out in the third column of the table in part A of Annex I of Directive 2009/28/EC on the promotion of the use of energy from renewable sources and amending and subsequently repealing Directives 2001/77/EC and 2003/30/EC, and pursuant to [Article 3] of [recast of Directive 2009/28/EC as proposed by COM(2016) 767];

Or. en
Amendment 605
Kateřina Konečná

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment

i. the Member State's binding national target of energy from renewable sources in gross final consumption of energy in 2030, with trajectory for target from 2021 onwards starting from the share of energy from renewable sources in the year 2020 as set out in the third column of the table in part A of Annex I of Directive 2009/28/EC on the promotion of the use of energy from renewable sources and amending and subsequently repealing Directives 2001/77/EC and 2003/30/EC, and pursuant to [Article 3] of [recast of Directive 2009/28/EC as proposed by COM(2016) 767];

Or. en

Amendment 606
Peter Liese

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a corridor for that contribution from 2021 onwards, which once finalised shall be considered binding on the Member State in question; each Member State shall take
into consideration the indicative benchmarks set by the Commission as outlined in Annex (X) of the Directive 2009/28/EC to ensure the fair contribution of each Member State to the EU-wide binding target of at least 27%. By setting the benchmarks, the Commission will define a corridor from 2021 onwards. The lower bound of which starting from the share of energy from renewable sources in the year 2020 as set out in the third column of the table in part A of Annex I of Directive 2009/28/EC on the promotion of the use of energy from renewable sources and amending and subsequently repealing Directives 2001/77/EC and 2003/30/EC, and ending at a fair contribution of the respective Member State to an EU target of 27%, and the upper bound of which ending at a fair contribution to a 33% EU target;

Or. en

**Justification**

Corridors aim at giving more flexibility to the Member States compared to a linear trajectory. At the same time, the ambition should be raised. The share of 33,1% of renewables in 2030 is considered cost-effective by IRENA for the EU.

**Amendment 607**

Peter Liese

**Proposal for a regulation**

Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Member States must make an effort to increase the share of energy originating from renewable sources in gross final consumption of energy in 2030;

Amendment 611
Zdzisław Krasnodębski, Jadwiga Wiśniewska, Evžen Tošenovský

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target.

Justification

According to the Commission proposal, national contributions and objectives in terms of the Member State share of energy from renewable sources, along with the Commission competences to formulate recommendations if the objective is not ambitious enough (as in Art. 28) make the contributions and objectives de facto obligatory. Such a proposal goes beyond the European Council conclusions of October 2014 and March 2015 defining these objectives as binding only at EU level. The regulation should give the Member States more flexibility in finding the way to contribute to the EU goals.
Amendment 612
Rolandas Paksas

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission
i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment
i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to the achievement of this target in terms of the Member State's policies and measures, as appropriate based on their national circumstances, including the indicative share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Or. en

Amendment 613
Edward Czesak

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission
i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment
i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution by the Member State to this target;

Or. pl
Justification

There is no reason to formulate, in the regulation, the national RES targets, which are actually becoming binding targets (monitoring system and sanctions for failing to implement them). The proposed amendment ensures compliance with the conclusions of the October 2014 European Council.

Amendment 614
Carolina Punset, Gerben-Jan Geerbrandy, Fredrick Federley

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment

i. with a view to achieving the Union's binding target of at least 35% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with biennial milestones on a binding linear trajectory for that contribution from 2021 onwards, or a national target for 2030 pursuant to [recast of Directive 2009/28/EC];

Or. en

Justification

In particular for smaller Member States, renewable energy is not expected to develop gradually, but rather shock-wise (for example a faster deployment of renewable energy after the completion of a large offshore wind farm). By introducing milestones for each two years we provide Member States more flexibility, while maintaining the linear trajectory. The second part of the amendment underlines support for nationally binding renewable energy targets, as the most robust option to deliver on the EU-wide binding target.

Amendment 615
Evžen Tošenovský

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

**Or. en**

Amendment 619
Merja Kyllönen
Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

*Text proposed by the Commission*

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

*Amendment*

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards, *based on Member State’s choice*;

*Or. en*

**Justification**

A linear trajectory should be just one of the options. Other kinds of trajectories should be possible as well in order to assure greater flexibility. A nonlinear trajectory better reflects a real development based on, e.g. national specificities, choices, circumstances, technological developments and changing external conditions.

**Amendment 620**
Jaromír Kohlíček

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

*Text proposed by the Commission*

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

*Amendment*

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards *based on Member State’s choice*.
Amendment 621

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission
i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment
i. with a view to achieving the Union's binding target on renewable energy in 2030, as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with an indicative trajectory for that contribution from 2021 onwards;

Or. en

Amendment 622
Jerzy Buzek, Janusz Lewandowski, Andzej Grzyb, Marian-Jean Marinescu, Markus Pieper, Vladimir Urutchev, Christian Ehler

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission
i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption

Amendment
i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption
consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

consumption of energy in 2030, with an adequate trajectory for that contribution from 2021 onwards;

(Annex I, part 1.)

Justification

It is difficult to sustain RES deployment in a linear trajectory. With past evidence of observed differences between specific years, Member States should be given a degree of flexibility to define the RES-development trajectory in a deliverable manner.

Amendment 623
Pavel Telička

Proposal for a regulation
Article 4 – paragraph 1 – point a – point 2 – point i

Text proposed by the Commission

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment

i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a trajectory for that contribution from 2021 onwards based on Member State’s choice;

Or. en

Justification

The linear trajectory is not always realistic and feasible, it is therefore desirable to give MSs certain flexibility in choosing their trajectory for reaching the objectives of Union’s climate and energy policy.

Amendment 624

i. with a view to achieving the Union’s binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State’s share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;

Amendment

i. with a view to achieving the Union’s binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State’s share of energy from renewable sources in gross final consumption of energy in 2030, with an objective for that contribution from 2021 onwards;

Or. en

Justification

Instead of linear trajectories, it is proposed to set goals. To reach those goals Member States need flexibility to react to economic crisis and other unforeseeable occasions.

Theresa Griffin, Carlos Zorrinho, Edouard Martin, Pervenche Berès, Flavio Zanonato, Nessa Childers, Jude Kirton-Darling, Nicola Caputo, Clare Moody, Csaba Molnár, Kathleen Van Brempt, Olle Ludvigsson, Jytte Guteland, Jeppe Kofod, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, José Blanco López

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 1

Text proposed by the Commission

the indicative national energy efficiency contribution to achieving the Union's binding energy efficiency target of 30% in 2030 as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], based on either primary or final energy consumption, primary or final energy savings, or energy intensity.

Amendment

with a view to achieving the Union's binding energy efficiency target of at least 40% in 2030 and the Member State's binding national energy efficiency target as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], based on either primary or final energy consumption, primary or final energy savings, or energy intensity. The Union's 2020 energy consumption shall be no more than 1483 Mtoe of primary energy and no more than 1086 Mtoe of final energy, the Union's 2030 energy consumption shall be no more
than 1132 Mtoe of primary energy and no more than 846 Mtoe of final energy for the first ten-year period.

Amendment 645
Michèle Rivasi, Claude Turmes
on behalf of the Verts/ALE Group

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 1

Text proposed by the Commission

the indicative national energy efficiency contribution to achieving the Union's binding energy efficiency target of 30% in 2030 as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], based on either primary or final energy consumption, primary or final energy savings, or energy intensity.

Amendment

with a view to achieving the Union's binding energy efficiency target of at least 40% in 2030, the Member State's maximum binding national energy consumption level as set out in Annex I b in both primary and final energy terms. The Union's 2020 energy consumption shall be no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union's 2030 energy consumption shall be no more than 1 132 Mtoe of primary energy and no more than 846 Mtoe of final energy for the first ten-year period;

Justification

(This amendment is replacing AM 76 of the draft report.)

Amendment 646
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 1
With a view to achieving the Union's binding energy efficiency target of at least 40% in 2030, the Member State's binding national energy efficiency target as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], the Union's energy consumption shall be no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union's 2030 energy consumption shall be no more than 1 132 Mtoe of primary energy and no more than 846 Mtoe of final energy for the first ten-year period;

Or. en
the objective is not ambitious enough (as in Art. 28) make the contributions and objectives de facto obligatory. Such a proposal goes beyond the European Council conclusions of October 2014 and March 2015 defining these objectives as indicative. The regulation should give the Member States more flexibility in finding the way to contribute to the EU goals.

Amendment 648
Theresa Griffin, Carlos Zorrinho, Edouard Martin, Pervenche Berès, Flavio Zanonato, Nessa Childers, Jude Kirton-Darling, Nicola Caputo, Clare Moody, Csaba Molnár, Eugen Freund, Karin Kadenbach, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Jeppe Kofod, Miroslav Poche, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, Patrizia Toia, José Blanco López

Amendment 658
Angelo Ciocca, Lorenzo Fontana

PE606.313v01-00 100/169 AM\1129185EN.docx
Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall explain the underlying methodology and the conversion factors used;

Or. it

Justification

Inclusion of a proportionality criterion.

Amendment 659
Merja Kyllönen

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption or final energy consumption in 2020 and 2030. They shall explain their underlying methodology and the conversion factors used;

Or. en

Justification

The reform of the EED obliges Member States to express their target in primary and final energy. This will however not allow for Member States to fully account the energy efficiency improvements in the primary to final energy transformation sector (such as cogeneration).
Member States should also in future be allowed the flexibility to express their national contribution in primary or final energy.

Amendment 660
András Gyürk, György Hölvényi

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission
Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030. They shall explain their underlying methodology and the conversion factors used;

Or. en

Amendment 661
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission
Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with biennial milestones on a binding linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Or. en
Justification

In particular for smaller Member States, renewable energy is not expected to develop gradually, but rather shock-wise (for example a faster deployment of renewable energy after the completion of a large offshore wind farm). By introducing milestones for each two years we provide Member States more flexibility, while maintaining the linear trajectory.

Amendment 662
Jaromír Kohlíček

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a trajectory for that contribution from 2021 onwards based on Member States’ choices. They shall explain their underlying methodology and the conversion factors used;

Or. en

Amendment 663
Evžen Tošenovský

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a trajectory for that contribution from 2021 onwards based on Member States’ choices. They shall explain their underlying methodology and the conversion factors used;
Amendment 664
Theresa Griffin, Carlos Zorrinho, Edouard Martin, Pervenche Berès, Flavio Zanonato, Nessa Childers, Jude Kirton-Darling, Nicola Caputo, Clare Moody, Csaba Molnár, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Jeppe Kofod, Miroslav Poche, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, José Blanco López

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall express their energy efficiency targets in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a binding linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Or. en

Amendment 665
Kateřina Konečná

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030 and the trajectory set by the Member State for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Or. en
Amendment 666
Piernicola Pedicini, Dario Tamburrano, Eleonora Evi, David Borrelli, Rosa D'Amato

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

*Text proposed by the Commission*

Member States shall express their *contribution* in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that *contribution* from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

*Amendment*

Member States shall express their *energy efficiency targets* in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a *binding* linear trajectory for that *target* from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Or. en

Amendment 667
Massimiliano Salini, Elisabetta Gardini

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

*Text proposed by the Commission*

Member States shall express their contribution in terms of absolute level of primary energy consumption *and final energy consumption* in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

*Amendment*

Member States shall express their contribution in terms of absolute level of primary energy consumption in 2020 and 2030, with an *indicative* trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Or. en

Amendment 668
Pavel Telička

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2
Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption or final energy consumption in 2020 and 2030, with a trajectory for that contribution from 2021 onwards based on Member State's choice. They shall explain their underlying methodology and the conversion factors used;

Or. en

Justification

The linear trajectory is not always realistic and feasible, it is therefore desirable to give MSs certain flexibility in choosing their trajectory for reaching the objectives of Union’s climate and energy policy. A nonlinear trajectory better reflects a real development. National targets should be set either through primary energy sources or through final energy consumption.

Amendment 669

Gunnar Hökmark, Angélique Delahaye, Krišjānis Karinš, Christofer Fjellner, Marian-Jean Marinescu, Jerzy Buzek, Mairead McGuinness, Françoise Grossetête, Henna Virkkunen, Lefteris Christoforou, Herbert Reul, Anne Sander, Michel Dantin, Francesc Gambús, Angelika Niebler, Pilar del Castillo Vera, Vladimir Urutchev

Proposal for a regulation

Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with an indicative trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Or. en
Amendment 670
Henna Virkkunen, Hannu Takkula

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 1 – paragraph 2

Text proposed by the Commission

Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Amendment

Member States shall express their contribution in terms of absolute level of primary energy consumption or final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards. They shall explain their underlying methodology and the conversion factors used;

Or. en

Amendment 671
Mireille D’Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 3

Text proposed by the Commission

(3) the objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private);

Amendment

(3) a diagnosis of the existing building stock, and the objectives of the long term renovation of the national stock of residential, commercial and administrative buildings, laying the accent on the potential for energy savings expected by focusing, to the extent possible and depending on Member States’ financial capacity, on thorough renovation and ambitious renovation strategies making for substantial energy savings of around 60% for a given building (public or private);

Or. fr

Amendment 672
Theresa Griffin, Carlos Zorrinho, Edouard Martin, Pervenche Berès, Flavio Zanonato,
Nessa Childers, Jude Kirton-Darling, Nicola Caputo, Clare Moody, Csaba Molnár, Eugen Freund, Karin Kadenbach, Kathleen Van Brempt, Miapetra Kumpula-Natri, Olle Ludvigsson, Jytte Guteland, Jeppe Kofod, Miroslav Poche, Giorgos Grammatikakis, Nikos Androulakis, Jo Leinen, Inmaculada Rodríguez-Piñero Fernández, Soledad Cabezón Ruiz, Miriam Dalli, José Blanco López, Claudiu Ciprian Tănăsescu, Victor Negrescu

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 3

Text proposed by the Commission

(3) the objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private);

Amendment

(3) the objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private), with the aim of providing for the decarbonisation of the building stock by 2050 and delivering affordability for tenants and owners of the buildings including policies and actions to target the worst performing segments of the national building stock, households subject to energy poverty

Or. en

Amendment 673
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D'Amato

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 3

Text proposed by the Commission

(3) the objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private);

Amendment

(3) the objectives for the 2030 and 2040 for the long-term renovation of the national stock of residential and commercial buildings (both public and private) measuring progress towards the 2050 goals of a highly energy efficient buildings stock, with very low energy needs which are covered by renewable energy sources;

Or. en
Amendment 674
Carolina Punset, Gerben-Jan Gerbrandy

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 3

Text proposed by the Commission

(3) the objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private);

Amendment

(3) the objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private) to achieve a Union’s final energy demand of no more than 169Mtoe in residential buildings and no more than 108Mtoe in tertiary buildings by 2030;

Or. en

Justification

In accordance with the 40% energy efficiency target scenario in the impact assessment (part 1, page 42) of the Energy Efficiency Directive 2012/27/EU.

Amendment 675
João Ferreira

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 3

Text proposed by the Commission

(3) the objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private);

Amendment

(3) the objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private) including concrete measures for households affected by energy poverty and for social housing;

Or. en

Amendment 676
Gunnar Hökmark, Angélique Delahaye, Krišjānis Kariņš, Christofer Fjellner, Marian-Jean Marinescu, Mairread McGuinness, Françoise Grossetête, Henna Virkkunen,

objectives, including long term targets or strategies and sectorial targets in areas such as transport, heating and cooling; objectives, including long term targets or strategies and sectorial targets in areas such as transport, heating and cooling or from sector-coupling policies or efficiency initiatives in other sectors with high energy-efficiency potential, such as energy transformation, transmission and distribution, water utilities, manufacturing industry or data centres, including energy use in homes and residential areas;

Or. es

Justification

A broader vision is needed, taking in energy use in housing and residential areas given its importance in overall energy consumption.

Amendment 681
Michel Dantin

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 5

Text proposed by the Commission

(5) other national energy efficiency objectives, including long term targets or strategies and sectorial targets in areas such as transport, heating and cooling;

Amendment

(5) other national energy efficiency objectives, including long term targets or strategies and sectorial targets in areas such as transport, heating and cooling. Member States may also include objectives for sectors with a high potential for improving energy efficiency, such as the water sector, in terms of water production and distribution and waste water treatment.

Or. fr

Justification

The water sector accounts for nearly 3.5% of overall electricity consumption in the EU. This is due to the fact that the pump and pressure systems for transporting water are powered by high-energy-consumption electric motors. This situation is likely to worsen by 2040 since
water demand is projected to increase by 25% (World Energy Outlook 2016, International Energy Agency, 2016)

Amendment 682
Mireille D'Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 5

<table>
<thead>
<tr>
<th>Text proposed by the Commission</th>
<th>Amendment</th>
</tr>
</thead>
<tbody>
<tr>
<td>(5) other national energy efficiency objectives, including long term targets or strategies and sectorial targets in areas such as transport, heating and cooling;</td>
<td>(5) other national energy efficiency objectives, including long term targets or strategies and sectorial targets in areas such as transport, heating and cooling or from sector coupling policies, not least as concerns the deployment of innovative urban heating systems harnessing, inter alia, waste energy from industrial facilities;</td>
</tr>
</tbody>
</table>

Amendment 683
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 5

<table>
<thead>
<tr>
<th>Text proposed by the Commission</th>
<th>Amendment</th>
</tr>
</thead>
<tbody>
<tr>
<td>(5) other national energy efficiency objectives, including long term targets or strategies and sectorial targets in areas such as transport, heating and cooling;</td>
<td>(5) other national energy efficiency objectives, including long term targets or strategies and sectorial targets in at least the areas of transport, heating and cooling, industry, and the water and wastewater sector;</td>
</tr>
</tbody>
</table>

Justification
There a significant energy saving potential in the industrial sectors, and in particular in the water sector which can help Member States to reach their national EE targets cost-effectively.
According to the IEA, around 3.5% of electricity in the EU is used by the water and wastewater segment (World Energy Outlook 2016). However, due to lack of awareness and information the potential has not been tapped.

Amendment 684
Dan Nica

Proposal for a regulation
Article 4 – paragraph 1 – point b – point 5

Text proposed by the Commission

(5) other national energy efficiency objectives, including long term targets or strategies and sectorial targets in areas such as transport, heating and cooling;

Amendment

(5) other national energy efficiency objectives, including long term targets or strategies and sectorial targets in areas such as energy transmission and distribution, transport, heating and cooling;

Michel Dantin

Proposal for a regulation
Article 4 – paragraph 1 – point d – point 1

Text proposed by the Commission

(1) the level of electricity interconnectivity that the Member State aims for in 2030 in consideration of the electricity interconnection target for 2030

Amendment

(1) the level of electricity interconnectivity that the Member State aims for in 2030 in consideration of the electricity interconnection target for 2030
of at least 15 %; Member States shall explain the underlying methodology used;
of at least 15 %, *insofar as national and regional capacities permit*; Member States shall explain the underlying methodology used;

**Amendment 707**

**Angelo Ciocca, Lorenzo Fontana**

**Proposal for a regulation**

**Article 4 – paragraph 1 – point d – point 1**

**Text proposed by the Commission**

(1) the level of electricity interconnectivity that the Member State aims for in 2030 *in consideration of the electricity interconnection target for 2030 of at least 15 %*; Member States shall explain the underlying methodology used;

**Amendment**

(1) the level of electricity interconnectivity that the Member State aims for in 2030; Member States shall explain the underlying methodology used;

**Or. it**

**Justification**

*There is as yet no agreed methodology for calculating the interconnectivity target; in accordance with the European Council conclusions of October 2014, it should be achieved by implementing projects of common interest (PCIs).*

**Amendment 708**

**Carolina Punset, Gerben-Jan Gerbrandy**

**Proposal for a regulation**

**Article 4 – paragraph 1 – point d – point 1**

**Text proposed by the Commission**

(1) the level of electricity interconnectivity that the Member State aims for in 2030 *in consideration of the electricity interconnection target for 2030 of at least 15 %; Member States shall explain the underlying methodology used;*

**Amendment**

(1) the level of electricity interconnectivity that the Member State aims for in 2030 *with a view to achieving the electricity interconnection target for 2030 of at least 15 %, increasing from 10% in 2020 and a roadmap for the*
compliance with these targets;

</table>
especially to ensure high-quality power supplies that foster social and economic growth in all regions, in particular underdeveloped ones;

Or. es

Justification

Substandard, underpowered new electrical power supply networks, as is the case in Andalusia, are hampering the socio-economic development of underdeveloped regions.

(3) national objectives with regard to competitiveness of the individual supply chains across Europe as a whole and the according European economic activities on which they are based.

Or. en

Justification

An alignment with the Communication COM(2015)80 on the Energy Union Package is essential, in which competitiveness is defined more precisely and in connection to the objective of achieving technology leadership built on and around a European economic activities base.

Amendment 748
Dario Tamburrano, Piernicola Pedicini, David Borrelli, Eleonora Evi, Rosa D’Amato

Proposal for a regulation
Article 4 – paragraph 1 – point e a (new)

Text proposed by the Commission

(ea) as regards the dimension “a social approach to energy”:

1. binding national targets shall be established for the period up to 2030 in respect of the social benefits connected with energy, energy efficiency improvement and the deployment of renewable energy sources in the EU. These targets shall relate to

(i) reducing energy poverty;

(ii) increasing the generation of energy from renewable sources through energy communities, self-generators and consumers, and self-generating companies and local authorities, as expressed in toe;
(iii) reducing energy consumption and \( CO_2 \) emissions through improved behavioural efficiency;

(iv) reducing health impacts (including financial impacts) owing to lower levels of emissions of atmospheric pollutants thanks to the deployment of renewable energy sources and energy efficiency measures;

(v) reducing the share of per capita income devoted to energy;

(vi) increasing the share of per capita income derived from self-generation;

2. the objectives described in paragraph 1 shall be considered accumulative and may be achieved through compensatory variations in the linear trajectories referred to in paragraph 5, including to allow for adjustments in response to technological and social innovations;

3. measures shall be taken to minimise any increase in energy prices for the public, especially for disadvantaged families, and to prevent any tax incentives or other incentives for the development of energy efficiency and/or renewables creating barriers based on income and/or disadvantageous conditions;

4. measures shall be taken to ensure that markets do not fuel price increases but guarantee the right to an energy supply essential to a decent life;

5. measures shall be taken to ensure that measures to promote renewable sources can mutually reinforce those concerning energy efficiency, especially in respect of the public and SMEs, who are considered to be most vulnerable from an energy innovation standpoint;

6. Member States must establish a national linear trajectory for achieving the objectives referred to in paragraph 1.
Justification

Adding a social pillar to the Energy Union will help to genuinely place people at the centre of the process of transformation of the energy system and to recognise their fundamental role in attaining the EU’s objectives with regard to renewable energy, energy efficiency and combating climate change. The social dimension of energy therefore warrants specific attention rather than just indirect references within the chapters on the market.

Amendment 749

Member States’ contribution setting process in the area of renewable energy

1. When setting their contribution for their share of energy from renewable sources in gross final consumption of energy in 2030 and the last year of the period covered for the subsequent national plans, pursuant to Article 4(a)(2)(i), Member States shall take into account the following:

   (a) the measures provided for in [recast of Directive 2009/28/EC as proposed by COM(2016) 767];

   (b) the measures adopted to reach the energy efficiency target adopted pursuant to Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761];

   (c) other measures to promote renewable energy within Member States and at Union level; and

   (d) circumstances affecting renewable energy deployment, such as:

   (i) equitable distribution of
deployment across the European Union;
(ii) economic potential;
(iii) geographical and natural constraints, including those of non-interconnected areas and regions; and
(iv) the level of power interconnection between Member States.

2. Member States shall collectively ensure that the sum of their contributions adds up to at least 27% of energy produced from renewable sources in gross final energy consumption at Union level by 2030.

(a) the measures provided for in [recast of Directive 2009/28/EC as proposed by COM(2016) 767];

(b) the measures adopted to reach the
energy efficiency target adopted pursuant to Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761];

(c) other measures to promote renewable energy within Member States and at Union level; and

(d) circumstances affecting renewable energy deployment, such as:

(i) equitable distribution of deployment across the European Union;

(ii) economic potential;

(iii) geographical and natural constraints, including those of non-interconnected areas and regions; and

(iv) the level of power interconnection between Member States.

2. Member States shall collectively ensure that the sum of their contributions adds up to at least 27% of energy produced from renewable sources in gross final energy consumption at Union level by 2030.

Amendment 753
Paul Brannen, Theresa Griffin, Jude Kirton-Darling

Proposal for a regulation
Article 5 – paragraph 1 – point d – point i

Text proposed by the Commission
(i) equitable distribution of deployment across the European Union;

Amendment
(i) equitable distribution of deployment across the European Union
while taking into account the climate change mitigation potential of different sources of energy, the level of impact on levels of carbon dioxide in the atmosphere and payback time;

Or. en

*Justification*

The sources with high CO2 reduction potential should be promoted instead of high reliance on sources, and particular type of feedstock, that has lower mitigation potential, and can even have negative results compared to fossil fuels.

Article 5 – paragraph 2

2. **Member States shall collectively ensure that the sum of their contributions adds up to at least 27% of energy produced from renewable sources in gross final energy consumption at Union level by 2030.**

AM\1129185EN.docx 151/169 PE606.313v01-00
adds up to at least 27% of energy produced from renewable sources in gross final energy consumption at Union level by 2030.

adds up to a linear trajectory reaching at least 35% from renewable energy sources in gross final energy consumption at Union level by 2030.

Amendment 766
Mireille D'Ornano, Jean-François Jalkh, Sylvie Goddyn

Proposal for a regulation
Article 5 – paragraph 2 a (new)

Text proposed by the Commission

2a. Some Member States already generate around 50% of their domestically-consumed electricity from domestic renewable energy sources, while this figure is much lower in other Member States. The Commission must take these major differences into account in its guidelines and recommendations for the Energy Union and, furthermore, should address any imbalance or distortion of the European electricity markets which might arise from them.

Amendment 767
Carolina Punset, Gerben-Jan Gerbrandy, Fredrick Federley

Proposal for a regulation
Article 5 – paragraph 2 a (new)

Text proposed by the Commission

2a. By 30 June 2018, the European Commission shall publish guidelines on the equitable and cost-effective distribution of deployment and other circumstances affecting renewable energy deployment in each Member State, based on an assessment of options for delivering
a linear trajectory towards the Union overall binding target of at least 35% from renewable energy sources in final energy consumption at Union by 2030. The guidelines shall be taken into account in the Member States’ contribution setting process.

Or. en

**Justification**

*Requires the European Commission to set out more clearly a fair and economic renewable energy deployment level for each Member State. This information should serve as a benchmark for the assessment of the contributions of the Member States.*

Amendment 768
Michel Dantin

Proposal for a regulation
Article 5 – paragraph 2 a (new)

<table>
<thead>
<tr>
<th>Text proposed by the Commission</th>
<th>Amendment</th>
</tr>
</thead>
<tbody>
<tr>
<td>2a. Member States shall ensure collectively that the sum of their contributions in biofuels and bioliquids from food products fulfilling the sustainability criteria total a maximum 7% of overall EU energy consumption in the transport sector by 2030.</td>
<td></td>
</tr>
</tbody>
</table>

Or. fr

**Justification**

*Conventional biofuels and bioliquids fulfilling the sustainability criteria should be taken into account in the Member States’ climate objectives. Specifically, conventional biofuels produced in Europe actually help reduce greenhouse gas emissions. According to the Globium study they have a limited ILUC effect similar to that of advanced biofuels, and do not lead to deforestation or marsh drainage.*

Amendment 769

Amendment

Article 6 deleted

Member States' contribution setting process in the area of energy efficiency

1. When setting their indicative national energy efficiency contribution for 2030 and the last year of the period covered for the subsequent national plans pursuant to Article 4(b)(1), Member States shall ensure that:

(a) the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union's 2030 energy consumption is no more than 1 321 Mtoe of primary energy and no more than 987 Mtoe of final energy for the first ten-year period;

(b) the Union’s binding target for 2030 referred to in Articles 1 and 3 of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761] is met.

In addition, Member States shall take into account:

(a) the measures provided for in Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761];

(b) other measures to promote energy efficiency within Member States and at Union level.

2. When setting their contribution referred to in paragraph 1 Member States may take into account circumstances affecting primary and final energy consumption, such as:

(a) remaining cost-effective energy-saving potential;
(b) evolution and forecast of gross domestic product;

(c) changes of energy imports and exports;

(d) development of all sources of renewable energies, nuclear energy, carbon capture and storage; and

(e) early actions.
COM(2016)761] is met.

In addition, Member States shall take into account:

(a) the measures provided for in Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761];
(b) other measures to promote energy efficiency within Member States and at Union level.

2. When setting their contribution referred to in paragraph 1 Member States may take into account circumstances affecting primary and final energy consumption, such as:

(a) remaining cost-effective energy-saving potential;

Amendment 773
Angelo Ciocca, Lorenzo Fontana

Proposal for a regulation
Article 6 – paragraph 1 – subparagraph 1 – point a

<table>
<thead>
<tr>
<th>Text proposed by the Commission</th>
<th>Amendment</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption is no more than 1 321 Mtoe of primary energy and no more than 987 Mtoe of final energy for the first ten-year period;</td>
<td>Deleted</td>
</tr>
</tbody>
</table>

Or. it

Justification

Imposing a ceiling on energy consumption in absolute terms means imposing a limit on
economic growth and therefore compromising both the political objective of 20% of GDP to be derived from industry and the ‘constitutional’ objective of full employment referred to in Article 3(1) TEU.

Amendment 774
Markus Pieper, Jerzy Buzek

Proposal for a regulation
Article 6 – paragraph 1 – subparagraph 1 – point a

_text proposed by the Commission_  
(a) the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption is no more than 1 321 Mtoe of primary energy and no more than 987 Mtoe of final energy for the first ten-year period;

_amendment_  
(a) the Union’s 2020 energy consumption is presumably no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption is presumably no more than 1 321 Mtoe of primary energy and no more than 987 Mtoe of final energy for a ten-year period, subject to the bi-annual revision of the baseline according to Article 3(4) Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761],

_justification_

Targets should be set in accordance with the rules of Directive 2012/27/EU and adaptable on the basis of a bi-annual review, as the absolute target set by the EED for the year 2020 was already achieved in 2014 due to the economic crisis.

Amendment 775
Merja Kyllönen

Proposal for a regulation
Article 6 – paragraph 1 – subparagraph 1 – point a

_text proposed by the Commission_  
(a) the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy and no more than 1 086 Mtoe of final energy

_amendment_  
(a) on the basis of assumed energy consumption projections, the Union’s 2020 energy consumption should be no
Mtoe of final energy, the Union’s 2030 energy consumption is no more than 1 321 Mtoe of primary energy and no more than 987 Mtoe of final energy for the first ten-year period; more than 1 483 Mtoe of primary energy or no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption should be no more than 1 321 Mtoe of primary energy or no more than 987 Mtoe of final energy for the first ten-year period;

Or. en

Amendment 776
Massimiliano Salini, Elisabetta Gardini

Proposal for a regulation
Article 6 – paragraph 1 – subparagraph 1 – point a

Text proposed by the Commission

(a) the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption is no more than 1 321 Mtoe of primary energy and no more than 987 Mtoe of final energy for the first ten-year period;

Amendment

(a) the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy, the Union’s 2030 energy consumption is no more than 1 321 Mtoe of primary energy for the first ten-year period;

Or. en

Amendment 777
Werner Langen, Herbert Reul

Proposal for a regulation
Article 6 – paragraph 1 – subparagraph 1 – point a

Text proposed by the Commission

(a) the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption is no more than 1 321 Mtoe of primary energy and no more than 987 Mtoe of final energy for the first ten-year period;

Amendment

(a) the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy or no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption is no more than 1 321 Mtoe of primary energy or no more than 987 Mtoe of final energy for the first ten-year period;
Justification

The current EED stipulates that countries may express their efficiency targets for 2020 as absolute values for primary energy consumption or for final energy consumption. It is incomprehensible why this choice should be eliminated in the new version of the EED. This is a significant change and reduces flexibility for Member States.

Amendment 778
Pavel Telička

Proposal for a regulation
Article 6 – paragraph 1 – subparagraph 1 – point a

Text proposed by the Commission
\[(a) \text{ the Union’s 2020 energy consumption is no more than 1 483 Mtoe of primary energy and no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption is no more than 1 321 Mtoe of primary energy and no more than 987 Mtoe of final energy for the first ten-year period;}\]

Amendment
\[(a) \text{ the Union’s 2020 energy consumption should be no more than 1 483 Mtoe of primary energy or no more than 1 086 Mtoe of final energy, the Union’s 2030 energy consumption should be no more than 1 321 Mtoe of primary energy or no more than 987 Mtoe of final energy for the first ten-year period;}\]

Justification

National targets should be set either through primary energy sources or through final energy consumption.

*Member States' contribution setting process in the area of Internal Energy Market*

1. For the Internal Energy Market purpose, in particular for the national interconnection targets, the following provisions shall apply:

(a) Member States that have not reached the minimum interconnection target of 10% shall include in their Integrated National Energy and Climate Plans a roadmap to the achievement of the target considering the most efficient investment projects, after having consulted affected Member States.

(b) The investment projects included in a Member State's roadmap, if the Member State has not reached a 10% level of interconnection, shall be subject to approval by the Commission and shall automatically increase the other affected Member States' binding interconnection target. For the purposes of the setting and
notification of 2030 targets, affected Member States shall include these projects as Prior Investment Projects for the Internal Market.

2. Member States shall take into account that projects included in a Member State's roadmap that has not reached a 10% level of interconnection shall be qualified as ‘Prior Investment Projects for the Energy Internal Market’ and shall be subject of the following specific provisions:

(a) Simplified procedures shall be established in national legislation for the necessary authorisations of these projects. Competent authorities can only deny the granting of the necessary authorisations or impose conditions for environmental reasons in the light of the environmental impact assessment. In these cases, affected Member States shall examine alternative projects to meet the interconnection targets and a revised roadmap shall be presented to the Commission for approval;

(b) ‘Prior Investment Projects’ shall be automatically qualified as projects of common interest;

(c) The Commission shall support Prior Investment Projects through an enabling framework comprising the enhanced use of Union funds, in particular financial instruments. Access to European funding shall not be conditioned to a specific positive cost benefit analysis;

(d) The only purpose of cost benefit analysis of these projects shall be the distribution of the cost between affected Member States;

(e) Delay or risk of delay in the implementation of these projects will entitle any affected Member State to require the Commission to designate an independent mediator for one or various projects whose decisions shall be
respected by affected parties; or alternatively to require the Commission to designate an independent technical expert to provide advice and propose changes on ongoing projects. EU funds shall be available for these purposes.
