\textit{Text proposed by the Commission}

Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on the establishment of the Reform Support Programme

\textit{Amendment}

The European Parliament rejects the European Commission’s proposal for REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on the establishment of the Reform Support Programme

Or. pt

\textit{Justification}

The Reform Support Programme seeks to force the implementation of neoliberal policies in the Member States, undermining social and labour rights and strengthening mega-capitalist economic and social positions. Moreover, non-rejection of the programme will simply strengthen the Commission’s hand in blackmailing the Member States and meddling in their internal affairs, thereby further undermining their sovereignty.

(1) In accordance with Articles 120 and 121 of the Treaty on the Functioning of the European Union ('the Treaty'), Member States are required to conduct their economic policies with a view to contributing to the achievement of the objectives of the Union and in the context of the broad guidelines that the Council formulates. The coordination of the economic policies of the Member States is therefore a matter of common concern.

Amendment

(1) In accordance with Articles 120 and 121 of the Treaty on the Functioning of the European Union ('the Treaty'), Member States are required to conduct their economic policies with a view to contributing to the achievement of the objectives of the Union, as defined in Article 3 of the Treaty on European Union, and in the context of the broad guidelines that the Council formulates. The coordination of certain economic policies of Member States is therefore a matter of common concern.

(3) **At Union level, the European Semester of economic policy coordination is the framework to identify national reform priorities and monitor their implementation.** Member States develop their own national multiannual investment strategies in support of those reform priorities. Those strategies should be presented alongside the yearly National Reform Programmes as a way to outline and coordinate priority investment projects to be supported by national and/or Union funding. They should also serve to use Union funding in a coherent manner and to maximise the added value of the financial support to be received notably from the programmes supported by the Union under investments, counter-cyclical economic policy, and provide a strong cohesion policy, within a Europe based on solidarity.

Amendment

(3) At Union level, the European Semester of economic policy coordination is the framework to identify national reform priorities from the European perspective and monitor their implementation. Member States develop their own national multiannual investment strategies in support of their reform priorities. Those strategies should be presented alongside the yearly National Reform Programmes as a way to outline and coordinate priority investment projects to be supported preferably by private sector funds. National and/or Union funding may contribute to some projects. The strategies should also serve to use Union funding in a coherent manner and to maximise the added value of the financial support to be received notably from the programmes supported by the Union under the European Regional Development Fund, the Cohesion fund, the European Social Fund, the European Maritime and Fisheries Fund and the European Agricultural Fund for Rural Development, the European Investment Stabilisation Function and InvestEU, where relevant.

(4) The economic and financial crisis has shown *the vulnerability of European economies and financial systems. The depth and duration of the subsequent recession, as well as the asymmetry of the current recovery, demonstrate the need for economic reform in order to build strong economic and social structures in Member States. (8) Other Union instruments and programmes also provide a significant contribution to improving conditions underpinning certain investments in Member States, which can be conducive to or be part of such reforms. In particular, the Union Funds covered by Regulation (EU) No YYY/XX of the European Parliament and of the Council [CPR] link investment to enabling conditions (formerly known as ex-ante conditionalities), foresee a macroeconomic governance mechanism and may finance costs of structural reforms linked to investments in policy areas relevant for cohesion policy. However, currently, no instrument foresees direct financial support that provides incentives for the Member States to implement reforms in all policy areas, in response to social, economic and environmental challenges identified in the European Semester. Moreover, there is currently no instrument providing specific and targeted financial and technical support to Member States whose currency is not the euro in their efforts to implement reforms that are relevant for joining the euro area.

Justification

Recent amendment to the Structural Reform Support Programme (published on 12.11.2018) already extends the objective of the Programme in order to support MS in preparation to euro-area accession: "actions and activities of the Programme should also be able to support reforms that may help Member States in their preparation to join the euro area, while respecting the principle of equal treatment of all Member States".

(22) It is necessary to establish a process for the submission of proposals for reform commitments by the Member States, and the content thereof. With a view to ensuring the expediency of procedures, a Member State should submit the proposal for reform commitments together with its national reform programme where the proposal relates to challenges identified in the European Semester, but in the form of a separate annex, which may also be submitted at a different point in time.
excessive imbalances should be particularly encouraged to come forward with reform proposals under the reform delivery tool, which address the problems that led to such excessive imbalances.

While participation in the Programme is voluntary, Member States experiencing excessive imbalances should be particularly encouraged to come forward with reform proposals under the reform delivery tool, which address the problems that led to such excessive imbalances.

In order to ensure the ownership of and a focus on relevant reforms, the Member States should identify the reform commitments in response to challenges identified in the context of the European Semester (including those challenges identified in country specific recommendations) and propose a detailed set of measures for their implementation, which should contain appropriate milestones and targets and a timetable for implementation over a maximum period of three years. Close cooperation between the Commission and the Member States should be sought and achieved throughout the process.

Ownership of structural reforms and political will in the Member States, including the involvement of the social partners, are essential for such a programme to be successful. In order to ensure the ownership of and a focus on relevant reforms, the Member States should identify the reform commitments in response to challenges identified in article 4 and article 6 of this regulation, including those in the context of the European Semester and propose a detailed set of measures for their implementation, which should contain appropriate milestones and targets and a timetable for implementation over a maximum period of three years. Justification

The Convergence Facility (CF) combines the functions of Reform delivery tool (RDT) and (Technical support instrument (TSI), whilst limiting potential beneficiaries to countries outside the euro area. Reform Support Programme should be open to all Member States to the full extent. In addition, CF is a hybrid of RDT and TSI and it does not present added value. At the same time, it is difficult to imagine a situation that Member states would propose two sets of reforms - separately for the CF and the RDT as it is set out later in the document.
