(1) In recent years, the challenge posed by corporate income tax avoidance has increased considerably and has become a major focus of concern within the Union and globally. The European Council in its conclusions of 18 December 2014 acknowledged the urgent need to advance efforts in the fight against tax avoidance both at global and Union level. The Commission in its communications entitled ‘Commission Work Programme 2016 - No time for business as usual’ and ‘Commission Work Programme 2015 - A New Start’ identified as a priority the need to move to a system whereby the country in which profits are generated is also the country of taxation. The Commission also identified as a priority the need to respond to our societies’ call in order to ensure a global level playing field, European ‘goldplating’ should be avoided.

The failure of the BEPS process to meet its original objectives underlines the importance of heightened country-level reporting for all large enterprises. Justification

1) Transparency is more an accountability issue than a responsibility issue. 2) There is no such thing as “fair tax competition” any more than there is for example “fair environmental regulation competition” or “fair trade competition”. For groups which carry out activities within the Union only through subsidiary undertakings or branches, subsidiaries and branches should publish and make accessible the report of the ultimate parent undertaking to the extent that the requested information is available to the subsidiary or branch. If the subsidiary or branch does not have all the requested information it should request its ultimate parent undertaking to provide it with all the information required to enable it to meet its obligation. If the information is not provided, the subsidiary or branch should publish and make accessible a report on itself and the undertakings and branches it controls containing all information in its possession, obtained or acquired, and identify whether information on the ultimate parent undertaking is provided. However for reasons of proportionality and effectiveness, the obligation to publish and make accessible the report should be limited to medium-sized or large subsidiaries established in the Union, or branches of a comparable size opened in a Member State. Text proposed by the Commission: (6) The public should be able to scrutinise all the activities of a group when the group has certain establishments within the Union. For groups which carry out activities within the Union only through subsidiary undertakings or branches, subsidiaries and branches should publish and make accessible the report of the ultimate parent undertaking. However for reasons of proportionality and effectiveness, the obligation to publish and make accessible the report should be limited to medium-sized or large subsidiaries established in the Union, or branches of a comparable size opened in a Member State. Amendment: (6) The public should be able to scrutinise all the activities of a group when the group has certain establishments within and outside the Union. Multinational undertakings are operating worldwide and their corporate behaviour has a substantial impact on developing countries. Providing their citizens access to corporate country-by-country information would allow them and tax administrations in their countries to monitor, assess and/or hold those companies to account. By making the information public for each tax jurisdictions where the multinational undertaking have operations, the EU would increase its policy coherence for development and limit potential tax avoidance schemes in countries where domestic resources mobilization has been identified as a key component of the EU development policy.

Proposal for a directive
Recital 14

Text proposed by the Commission

(14) Since the objective of this Directive cannot be sufficiently achieved by the Member States but can rather, by reason of its effect, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality as set out in that Article, this Directive does not go beyond what is necessary in order to achieve that objective.

Amendment

(14) Since the objective of this Directive cannot be sufficiently achieved by the Member States but can rather, by reason of its effect, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. The EU action is thus justified in order to address the cross-border dimension where there is aggressive tax planning or transfer pricing arrangements. This initiative responds to the concerns expressed by interested parties about the distortions in the single market without compromising EU competitiveness. It should not cause undue administrative burden on companies, generate further tax conflicts or pose the risk of double taxation. In accordance with the principle of proportionality as set out in that Article, this Directive does not go beyond what is necessary in order to achieve that objective at least with regard to greater transparency.

This Directive is therefore considered to respect the fundamental rights and observes the principles recognised in particular by the Charter of Fundamental Rights of the European Union.

Amendment

(16) In accordance with the Joint Political Declaration of 28 September 2011 of Member States and the Commission on explanatory documents, Member States have undertaken to accompany, in justified cases, the notification of their transposition measures with one or more documents explaining the relationship between the components of a directive and the corresponding parts of national transposition instruments, for example in the form of a comparative chart. Proposal for a directive
Article 1 – paragraph 1 – point 2
Directive 2013/34/EU
Chapter 10 a – Article 48 b – paragraph 4 – subparagraph 1

Text proposed by the Commission

Member States shall require branches which are opened in their territories by an undertaking which is not governed by the law of a Member State to publish on an annual basis the report on income tax information of the ultimate parent undertaking referred to in point (a) of paragraph 5 of this Article.

Amendment

Member States shall require branches opened in their territories by an undertaking which is not governed by the law of a Member State to publish on an annual basis a report on income tax information of the ultimate parent undertaking or the non-affiliated undertaking referred to in point (a) of paragraph 5 of this Article as regards the next financial year, if the information is available to the person(s) designated to carry out the disclosure formalities referred to in Article 48e(2). When the
information is not available, such person(s) shall request the ultimate parent undertaking not governed by the law of a Member State or the non-affiliated undertaking referred to in point (a) of paragraph 5 of this Article to provide all information required to meet their obligations. If despite that the information is not provided, the report shall contain information on the undertaking that has the branch and the undertakings and branches it controls. The report shall identify whether income tax information on the ultimate parent undertaking or the non-affiliated undertaking is provided.

Or. en

Justification

In general in common law jurisdictions, national authorities are unable to effectively enforce any requirement for an entity of a multinational group to report on information that is not within its power and possession. This means that there are limitations on the extent to which entities of foreign headquartered MNEs that operate in the EU can be required to report on information concerning the whole multinational group. If the ultimate parent undertaking refuses to provide the information requested, the amendments allow the subsidiary or the undertaking with an EU branch (on which the reporting obligation falls on because it is the same entity as the branch) to only publish information in their possession. This means they are only required to publish a report on the undertakings and branches they control.

This concerns Action 13 of BEPS, but public country-by-country reporting (PCBCR) goes beyond the OECD recommendations.
