

WRITTEN QUESTION E-1361/04
by Camilo Nogueira Román (Verts/ALE)
to the Commission

Subject: Community employment policy and the conjunction of low per capita income and high unemployment in Objective 1 regions such as Galicia

There generally exists - as in Galicia - a relationship between low per capita income and high unemployment in the Objective 1 regions.

Will the Commission propose the political, legislative and financial measures that are required to create a close link between regional development policy and job creation policy? Does any EU-funded plan exist corresponding explicitly to such an approach? If so, what funding is allocated to it and what results have been achieved?
