

WRITTEN QUESTION E-1310/09
by Jim Allister (NI)
to the Commission

Subject: New Zealand

In view of the fact that New Zealand appears to be continuing to offload milk powders onto the world market, through an induced decline in price, will the Commission comment on the compatibility of New Zealand's actions with World Trade Organisation principles, and what representations are being made by the EU to stop what is effectively 'dumping' of milk powders onto the EU and world markets, and the unbalancing effect this is having?
