Subject: State aid for the chemical plant in Police, Poland

The chemical plant in Police is one of the biggest industrial plants in Poland. The plant has started to make a loss in the global financial crisis, so a restructuring plan has been drawn up and a request for the approval of state aid has been sent to the Commission. We are satisfied there is good will on the part of all those involved in the restructuring of the company. With this in mind, could the Commission say when it received the request, what aspects might hinder the granting of state aid to the plant, and what stage the procedure has currently reached?
