

**Question for written answer E-9685/2010
to the Commission**

Rule 117

Ernst Strasser (PPE) and Elisabeth Köstinger (PPE)

Subject: Notifications No 2009/701/F and No 2009/702/F

At the start of 2010, France notified the European Commission (Notifications No 2009/701/F and No 2009/702/F) of its intention to issue a decree relating to the labelling of construction and decoration products with their volatile pollutant emissions.

1. What is the Commission's position on the proposed introduction by France of a mandatory labelling procedure for construction and decoration products?
2. Does the Commission consider that the proposal by France involves any restriction on the single market?
3. To what extent is the Commission itself working on harmonisation measures in this field?
