Subject: Possible funding for a project to support people with disabilities

An association was recently set up in my constituency to carry out a project to build a centre for people with disabilities in a French ski resort near the Spanish border. This project aims to create a facility that can meet these people's particular needs during their stay in the mountains. It will also enhance dialogue, cohesion and mutual understanding between all sections of society.

Does the EU support this type of project? Is EU funding available? If so, who should the association contact?
