Subject: Studies on poverty

Bearing in mind the continued scarcity of reliable information and indicators on poverty trends, can the Commission provide the following information:

1. Are there any plans to carry out a comprehensive analysis of poverty and social exclusion, with support from Eurostat, that will compile statistics disaggregated by sex and age on the basis of a qualitative and participative approach?
2. Are there any plans to draw up, as a matter of urgency, a detailed, up-to-date study of the number of people living in poverty and the number at risk of falling into poverty in the coming months?
