

**Question for written answer E-005578/2014/rev.1
to the Commission**

Rule 117

Sergio Paolo Francesco Silvestris (PPE)

Subject: European funds received under the 'European territorial cooperation' objective

One of the three objectives of the European Financial Framework for 2007-2013 was 'European territorial cooperation'. The aim of this objective is to step up cross-border, transnational and interregional cooperation between European countries and regions, promoting efforts to find joint solutions to common problems between neighbouring authorities, such as urban, rural and coastal development and development of economic relations and networking of SMEs. The cooperation is directed towards various sectors, such as research, development, the information society, the environment, risk prevention and integrated water management.

In the context of this objective, can the Commission indicate how much funding was received by Austria, Germany, Italy, Romania, Belgium, Lithuania, the United Kingdom and Greece in the period 2007-2013?
