

**Question for written answer E-013177/2015
to the Commission**
Rule 130
Ian Duncan (ECR)

Subject: Electricity storage

Current state aid rules restrict Member States from awarding financial assistance to projects of common interest aimed at increasing the states' capacity to store electricity. Does the Commission have any plans to review state aid guidelines on this point, given the critical need of Member States to bolster their security of supply?
