Subject: Actions and responsibilities of the Commission regarding the cultural and creative industries

In December 2016 Parliament adopted a resolution on a coherent EU policy for cultural and creative industries¹, which identifies the key challenges and the current and prospective needs of the European cultural and creative industries.

Nine months after the adoption of this resolution, could you please explain in what way and through which measures the Commission is dealing with and helping the cultural and creative industries?

Could you also explain which DG – and more specifically who – is in charge of / responsible for these activities, and which actions were taken specifically as a result of the adoption of Parliament's resolution?
