

**Question for written answer E-000485/2018  
to the Commission**  
Rule 130  
**Rolandas Paksas (EFDD)**

Subject: Odometer manipulation

The European Commission should examine the issue of the exchange of odometer data between the competent authorities of the Member States. Furthermore, consideration should be given to the most appropriate ways of linking the existing national systems with a view to exchanging information on data related to roadworthiness testing and odometer readings between the competent authorities of Member States responsible for testing, registration and vehicle approval, the testing centres and the vehicle manufacturers.

What steps has the Commission taken to address the issue of the exchange of such data between the Member States?

Has the Commission assessed the possibility of establishing a European odometer blockchain network?

When does the Commission intend to report on the results of an analysis of the feasibility of using the electronic vehicle information system?
