

**Question for written answer E-004400/2018  
to the Commission**  
Rule 130  
**Ilhan Kyuchyuk (ALDE)**

Subject: Artificial intelligence

Artificial intelligence is blossoming and companies are investing increasing amounts in it. There is concern in some quarters that not enough attention is being paid to the wider social and moral consequences of this revolutionary technology. Recently, CNBC gathered opinions from a number of experts on the four most sinister outcomes of the use of artificial intelligence: mass unemployment, lethal warfare, mass surveillance, discrimination.

- 1) What are the Commission's policies and programmes on the development of artificial intelligence?
- 2) What steps will the Commission take to assuage concerns over the social and moral ramifications of this revolutionary technology?
