

**Question for written answer E-004448/2018
to the Commission**

Rule 130

Mairead McGuinness (PPE)

Subject: Daylight saving time

It has been reported that more than 80 % of respondents to the Commission's survey on daylight saving time are in favour of abolishing the changing of clocks in summer and winter.

Following such strong support from EU citizens, when will the Commission come forward with a proposal?

In its impact assessment, how does the Commission intend to analyse the impact of the time changes on the human biorhythm and on the single market?
