

Question for written answer E-005432/2018
to the Commission
Rule 130
Nathan Gill (EFDD)

Subject: World Diabetes Day

World Diabetes Day falls next month and aims to raise awareness of this condition, which affects over 33 million people all over the EU.

Does the Commission agree that reducing the EU budget would allow Member States to have more money available to spend on healthcare at home, thereby increasing awareness of health challenges such as diabetes, especially in light of the fact that healthcare is not an EU competence?
