

**Question for written answer E-002729/2019
to the Commission**
Rule 138
Ruža Tomašić (ECR)

Subject: Karst pastures

Karst pastures are included among Croatia's permanent grasslands.

What is the Commission's position on the possibility of special regulatory status and legal protection being granted to karst pastures in Croatia as specific landscape regions?

Is it possible, both legally and in terms of the payment of grants, for karst pastures to be put in a separate category from other permanent grasslands?
