

**Question for written answer E-002752/2019
to the Commission
Rule 138
Alex Agius Saliba (S&D)**

Subject: Healthier food policy

European public policies have an important role to play in supporting healthier and more sustainable food and diets, and in enabling a sustainable transition towards a more integrated food policy by making available healthy food produced in a sustainable way.

What is the Commission planning to do to step up action on launching a sustainable food policy that tackles agricultural, environmental, climate and societal issues in a holistic manner, while at the same time providing the necessary transition support to farmers?
