

**Question for written answer E-003355/2019
to the Commission**
Rule 138
Laura Ferrara (NI)

Subject: Calabria regional operational programme 2014-2020: projected multimodal system linking Lamezia Terme Airport with the Central Station, Germaneto and Catanzaro Lido

The projected multimodal system linking Lamezia Terme Airport with the Central Station, Germaneto and Catanzaro Lido is intended to improve regional mobility and enhance the quality, interconnectivity and efficiency of the Calabria transport network connections,

as part of the Calabria regional operational programme 2014-2020 (priority axis 7).

In its answer to Question 002581/2018, the Commission indicated that, contrary to what was indicated in the various official documents and communications from the Region of Calabria, the planned works were not classified as a major project requiring a specific application to be submitted.

According to the Commission, the managing authority agreed to submit a detailed time schedule with details of results achieved and expected.

However, little information has yet been released regarding the stage reached by the project.

In view of this:

1. Can the Commission say whether a major project application has been submitted in final form?
2. Has the managing authority submitted a detailed time schedule of works to be done and the expected periods of completion?
3. Will the project remain within budget for the period up to December 2019 (around EUR 20 million according to the Monitoring Committee estimate of 2 February 2018¹) and what expenditure has been notified to the Commission to date?
