

**Question for written answer E-003670/2019
to the Commission**
Rule 138
Ruža Tomašić (ECR)

Subject: Hydrogen as a fuel

Although awareness of the importance of hydrogen has been borne out by strategic documents that represent the first steps in the right direction, the use of hydrogen as a fuel across different means of transport varies between the Member States.

Does the Commission plan to take action to raise public awareness of new, efficient and environmentally conscious technologies such as hydrogen?
