

**Question for written answer E-003779/2019
to the Commission**

Rule 138

Ruža Tomašić (ECR)

Subject: Recycling and reuse of plastic waste

What recommendations does the Commission make with a view to reducing the use of plastic, i.e. making use of plastic waste through recycling and reuse, in order to achieve the objectives defined in the European Strategy for Plastics as quickly as possible?

Is the Commission working on using positive examples and practices in this area as examples of good practice in individual Member States? If so, how exactly?
