Subject: Supplies for production despite the coronavirus

Because of the coronavirus, industry in the EU is facing shortages in the supply of resources, which are damaging production. This is affecting the car industry and IT, for example.

1. What is the Commission's assessment of the future impact of the coronavirus on industry in the EU?
2. Could that impact have been alleviated by stronger preventive measures? If so, how, and by means of what measures?
3. How are the Union's supplies guaranteed in the context of the Green Deal, which imposes additional burdens on industry in the Union?
