

**Question for written answer E-003401/2020
to the Commission**
Rule 138
Laura Ferrara (NI)

Subject: Regional operational programme for Calabria 2007-2013: Cosenza – solar cogeneration plants not in operation

The installation of a system of some 28 parabolic solar concentrators at the Calabria's public sports facilities was paid for under the regional operational programme for Calabria, Pillar II ('Energy'), Specific Objective 2.1, Line of intervention 2.1.1 'Construction of renewable energy plants'.

The programme provided for works to the tune of EUR 1 345 855.27 which were due to be carried out in 2015.

Five year later, these solar panels are not in use; they appear to have been left to rust in the undergrowth.

Can the Commission therefore say:

1. Is this system of 'concentrated solar cogeneration' still in operation?
2. What does the Commission intend to do in this case?
