

**Question for written answer E-004348/2020
to the Commission**

Rule 138

Markus Buchheit (ID)

Subject: Free Trade Agreement with New Zealand

What impact on the producer price for milk in the European Union does the Commission expect there to be in view of New Zealand's wish to reduce import restrictions and tariffs on dairy products in particular?

Is there any forecast of the scale of the expected increase in exports from the EU to New Zealand?
