Subject: Recovery and Resilience Facility - specific measures

The Recovery and Resilience Facility aims to mitigate the economic and social impact of the coronavirus pandemic, and to make European economies and societies more sustainable, resilient and better prepared for the challenges and opportunities of the green and digital transitions.

EU rules on public procurement ensuring transparency, equal treatment, open competition and sound procedural management will play an essential role in promoting the recovery of the European economy and the protection and the creation of jobs in European countries.

To this end, within the framework of the Recovery and Resilience Facility, is the Commission planning:

1. Any sort of specific measure to allow companies with their registered office in the EU which protect and create jobs in Member States to benefit, as a matter of priority, from the Recovery and Resilience Facility?
2. The possibility to combine funds from the Recovery and Resilience Facility with EU structural funds in a single project in order to increase leverage?
3. Any update on EU State aid rules to support local distribution channels?
