

Question for written answer E-000154/2021
to the Commission
Rule 138
Sara Cerdas (S&D)

Subject: Availability of the COVID-19 vaccine

In 2021, the SARS-CoV-2 virus continues to threaten the world, with COVID-19 cases on the rise in the Member States of the European Union. Prevention measures need to continue apace and vaccination campaigns need to be expanded. .

1. What strategies is the Commission considering to step up the production and distribution of vaccines in the EU, thus helping to achieve herd immunity more quickly?
2. Does the Commission intend to urge the swift provision of the data necessary for EMA approval of vaccines to ensure the process runs smoothly and without unnecessary delays?
