

**Question for written answer E-000906/2021
to the Commission**
Rule 138
Biljana Borzan (S&D)

Subject: Wearable and mHealth healthcare solutions

The Commission has emphasised the importance of digital technologies as an integral component of EU public health. Commission President von der Leyen's comments on the essential role of data in the healthcare sector and the 2018 communication on digital health and care outline a possible path forward.

1. What role does the Commission see for wearables and mHealth in promoting public health?
2. As the pace of innovation accelerates, how does the Commission plan to ensure a regulatory process that supports growth and innovation in EU wearable and mHealth healthcare solutions?
