

**Question for written answer E-001239/2021
to the Commission**

Rule 138

Roman Haider (ID), Georg Mayer (ID)

Subject: EU Cancer Plan and vaccination figures

A new EU Cancer Plan was published on 3 February 2021. The action areas include the objective of vaccinating at least 90% of the EU target population of girls and significantly increasing the vaccination of boys, both by 2030¹.

1. What funds will be used in order to achieve these vaccination targets?
2. Will mandatory vaccination be a possible next step in the 'battle against cancer' if the targets are not met?
3. Will the measures be relaxed if the stated objective is reached by 2030?
