Subject: Overview of weapons confiscated under EUNAVFOR MED IRINI

The extended mandate of the EUNAVFOR MED IRINI military crisis management operation includes the task of monitoring the weapons embargo against Libya. Weapons have already been confiscated under the operation in this context.

1. What confiscations – broken down by type, value and origin – have taken place?
2. What has happened to the confiscated goods/weapons? Where were they taken?
3. Are there plans to sell the confiscated weapons so that the proceeds can be given to the Peace Facility? If so, what is the legal basis for this?
