Subject: EU web accessibility for persons with disabilities

Despite the improvements made in the accessibility of the EU institutions and agencies' websites and
online platforms, there are still some shortcomings in this area. For this reason, according to the new
EU disability strategy, the Commission must adopt an action plan on web accessibility this year to
ensure EU websites, the documents published on these websites and online platforms are compliant
with EU accessibility standards.

1. Can the Commission provide an update on progress with this work so far?

2. Can it state how, in accordance with its obligations under the UN Convention on the Rights of
Persons with Disabilities (Article 4(3)), it is actively involving persons with disabilities and the
organisations that represent them in the drafting of this action plan?

3. Can it clarify whether the online platform of Conference on the Future of Europe is fully
accessible to all people, including persons with disabilities, and if not, how accessibility will be
enhanced in this regard?
