Rule 138

Özlem Demirel (The Left)

Subject: 'Mini-concepts' of EUBAM Libya on preventing migration from Libya

EUBAM Libya has the task of preventing refugees from travelling to Europe and helping the Libyan authorities to pursue those helping them. To this end, EUBAM Libya has concluded cooperation agreements with Frontex and Europol and with EUNAVFOR MED IRINI on, among other things, training the civilian coastguard (GACS) and the military coastguard (LCGPS). Specific training measures have not been planned because of the persistent refusal of the Libyan government. Yet 'mini-concepts' on irregular migration, border management, maritime transport safety and organised crime are due to be put into operation.

1. What do the mini-concepts on irregular migration, border management and maritime transport safety consist of, who will implement them, and who are they aimed at?
2. Which partner institutions and Member States belong to the technical coordination group of EUBAM Libya?
3. What specific requests for support from Libyan partners have so far been submitted to the technical coordination group, and which of these are being acted upon as things currently stand?
