Subject: Emissions Trading System for aviation transport

Assuming that the Emissions Trading System (ETS) for aviation transport, as proposed in the Fit for 55 package, will be fully implemented:

1. What will the additional cost for a passenger per kilometre travelled on a plane be in 2030?
2. What will the additional cost per kilometre be in 2030 for goods transported on a cargo plane?
3. What will the total cost of investment needed for the application of the ETS for aviation transport be in 2030? What will the ratio of new jobs to lost jobs be in 2030?
