Rule 138
Marian-Jean Marinescu (PPE)

Subject: Emissions Trading System for buildings

Assuming that the Emissions Trading System (ETS) for buildings, as proposed in the Fit for 55 package, will be fully implemented:

1. What will the additional cost for heating a square metre be in 2030?
2. What will the total cost of investment needed for the application of the ETS for buildings for both suppliers companies and consumers be in 2030?
