

**Question for written answer E-004197/2021  
to the Commission**  
Rule 138  
**Marian-Jean Marinescu (PPE)**

Subject: Fit for 55 package – electrical energy / energy mix

Assuming that the Fit for 55 package will be fully implemented as it was proposed by the Commission:

1. what would be the total quantity of electrical energy necessary in 2030;
2. what will the energy mix be for that quantity of energy?
