

**Question for written answer E-000408/2022  
to the Commission**

Rule 138

**Marion Walsmann (PPE)**

Subject: Implementation of the Single Market Regulation

Regulation 2019/515 – the Single Market Regulation – entered into force on 19 April 2020, and its implementation raises a number of questions concerning the individualisation and tuning of parts of vehicles in circulation, national assessments and approvals.

1. Is the Commission reviewing the implementation of Regulation 2019/515 by Member States, and has it become aware of problems with Member States not implementing regulatory adjustments, leading to unacceptable downstream barriers to trade for economic operators? How exactly does the Commission intend to respond to these missing regulatory adjustments and how will it ensure that Member States make all necessary adjustments?
2. Can Member States require manufacturers to submit national assessments or approvals, even if the product concerned is already subject to a corresponding assessment or approval from another Member State?
