Subject: EU disability card

The EU is working to create a voluntary system whereby the status and benefits of persons with disabilities is mutually recognised to facilitate both travel and access to cultural events within Member States. The system is built around the EU disability card. According to the Strategy for the Rights of Persons with Disabilities 2021-2030, the Commission should propose the creation of a European card for persons with disabilities that would be recognised by all Member States by the end of 2023. In this connection:

1. At what stage is the planning of the EU disability card?
2. Does the Commission plan to speed up the process of drafting the proposal for an EU disability card?
3. If not, is the Commission planning a project similar to the EU disability card pilot project?
