

**Question for written answer E-000927/2022  
to the Commission**

Rule 138

**Marian-Jean Marinescu (PPE)**

Subject: Clarifications on the Commission Delegated Regulation amending Delegated Regulation (EU) 2021/2139

Annex 1, Section 4.29(1)(b) of the Commission Delegated Regulation amending Delegated Regulation (EU) 2021/2139 as regards economic activities in certain energy sectors and Delegated Regulation (EU) 2021/2178 as regards specific public disclosures for those economic activities, states that facilities for which the construction permit is granted by 31 December 2030, must comply with the following:

‘(i) direct greenhouse gas (GHG) emissions of the activity are lower than 270 g CO<sub>2</sub>e/kWh of the output energy, or annual direct GHG emissions of the activity do not exceed an average of 550 kgCO<sub>2</sub>e/kW of the facility’s capacity over 20 years’.

Can the Commission indicate which technology can comply with these technical requirements, giving examples of the application of that technology and the price of the electrical energy produced by it?
