Subject: Rosatom

Although the EU has sanctioned the Russian energy sector, including the oil and gas sectors, it is important for it to reduce its dependency on nuclear fuel and other goods provided by the Russian Rosatom State Atomic Energy Corporation.

1. How does the Commission assess Rosatom's activities in the nuclear sector in the EU Member States? What is the extent of their dependence on Rosatom?
2. What action is the Commission taking to limit Rosatom's activities in the EU? Have any steps been taken to develop alternatives to Rosatom's services?
3. Is the Commission planning to introduce EU sanctions against Rosatom, and if so, when?
