Subject: Erasmus4Ukraine

The war in Ukraine is generating an unprecedented humanitarian crisis. Over four million Ukrainians refugees have arrived in the EU, of which one million minors who were forced to interrupt their studies and training activities. This will have a serious impact on Ukraine's recovery in the post-war phase.

Since the outbreak of the conflict, the EU has strongly responded with military and humanitarian support and financial sanctions, but has not ensured a coordinated approach to guarantee Ukrainian refugees school and university continuity, leaving the Member States to bear the burden of organising education and training initiatives without proper political and financial support.

We would therefore like to ask the Commission the following questions:

1. What actions does it intend to put in place to guarantee all Ukrainian refugee students in the EU the right to educational and university continuity?
2. It is considering the possibility of launching an extraordinary 'Erasmus4Ukraine' programme for university students, which would provide for free enrolment at a university during the current academic year, an exception to the requirement for there to be a learning agreement between the two universities in question and the recognition of qualifications and credits acquired at universities in the Member States?
3. Does it intend to finance the aforementioned activities using the funds for youth mobility provided for by the Erasmus+ programme that were not spent during the pandemic?
