

**Question for written answer E-001485/2022
to the Commission**

Rule 138

Özlem Demirel (The Left)

Subject: Communication between emergency services across the EU

Under the BroadWay project, the Commission is funding the development of an interoperable broadband mobile system for public safety and security to connect emergency services and increase their cross-border interoperability. As part of this project, a Europe-wide pilot system is to be developed, tested and validated.

1. Was the BroadWay pilot system developed, tested and validated as planned in 2021 and where?
2. What further tests will be carried out in 2022 and by who?
3. What phases of the BroadWay project are arms corporations involved in and what are they are tasked with doing?
