Subject: Gender gap regarding pensions

According to Eurostat figures for 2019, women's pensions in the EU were on average 29% lower than those of men. However, Principle 15 of the European Pillar of Social Rights states that women and men shall have equal opportunities to acquire pension rights and that everyone in old age has the right to resources that ensure living in dignity.

1. How is the Commission planning to tackle the gender pension gap?
2. To this end, what lessons will it draw from the 2021 pension adequacy report?
