The infringement procedure 2014/4231 concerns a wide number of issues on the rules applicable to the employment of different categories of workers in the Italian public sector and their compatibility with Directive EC/1999/701. Since the sending of the additional letter of formal notice on 3 December 2020, the Commission has received several replies from the Italian authorities. The Commission is currently analysing the content of those replies. Once the assessment is finalised, the Commission will take a decision on the possible next steps in the infringement procedure.

The Commission is therefore not in a position to provide further details at this stage on the responses from the Italian authorities.
