

**Question for written answer E-002362/2022
to the Commission**

Rule 138

Francisco José Millán Mon (PPE)

Subject: Negative effects of inflation on the Recovery and Resilience Facility

The European Parliament adopted a resolution on the implementation of the Recovery and Resilience Facility (2021/2251(INI)) on 23 June 2022. In paragraph 29 of the resolution, Parliament emphasises “that inflation can also potentially lead to a negative change in the expected outcome of the RRF and estimated costs of the Member States’ NRRPs” and that it expects “the determination, unity and speediness of the EU response to this new crisis to continue.”

For her part, the Vice-President of the Commission responsible for Democracy and Demography has admitted inflation is likely to lead to fewer projects being financed under the RRF¹.

In the light of the above:

What action is the Commission considering in response to the negative effects of inflation on the expected outcome of the RRF?
