

Question for written answer E-002873/2022
to the Commission
Rule 138
Roman Haider (ID)

Subject: EU Forest Strategy for 2030

The EU Forest Strategy for 2030 aims to increase the quality and quantity of forests in the Union and adapt them to the new climate conditions in Europe brought about by climate change¹².

1. How does the Commission intend, through such a Union-wide programme, to recognise the great differences between the various forest areas in the Union?
2. To what extent can the Commission's actions better enlarge, strengthen and shape forests according to the cultural and economic interests of individual Member States than foresters and farmers on the ground?
3. What is the Commission's view of the energy wood shortage feared as a result of the EU Forestry Strategy for 2030 and the entrenchment of the ensuing dependence on imported energy?
