

**Question for written answer E-002900/2022
to the Commission**

Rule 138

Marian-Jean Marinescu (PPE)

Subject: Most efficient installations in the sectors covered by EU ETS

I would like to thank the Commission for its answer P-002342/2022 to my written question P-002342/2022.

Its answer states that: 'The list of each facility's greenhouse gas emission intensities, used to establish the benchmarks, is not publicly available due to commercial confidentiality restrictions'.

Please note that I did not ask for the intensity of emissions; I only asked for the list of best performers' installations. I do not think this list is subject to commercial confidentiality restrictions.

I will therefore repeat my question:

Please indicate the list of best performers' installations in the area covered by the EU Emissions Trading Scheme (ETS) and the number of allowances received by these installations.
